

## Belt pressure filter

### Product introduction and features:

DYC belt filter press is specially designed for the large treatment capacity of pre concentrated sludge to meet the needs of high load work. The machine also has a detachable fully enclosed cover to meet the environmental protection requirements of the design of the dehydration machine room.

### Main specifications and parameters:

Model	DYC1000	DYC1500	DYC2000	DYC2500	DYC3000
Filter belt width (mm)	1000	1500	2000	2500	3000
Filter belt speed (m/min)	1.5-6.0				
Main engine transmission power (Kw)	1.1	1.5	2.2	2.2	3.0
Cleaning water pressure (MPa)	≥0.5				
Cleaning water volume (m <sup>3</sup> /h)	4-6	6-10	9-15	12-20	15-25
Host noise (dB (A))	≤75				
Host quality (Kg)	3800	4500	5500	6600	7200
Operating weight (Kg)	4200	5200	6500	7200	8500
Overall dimension (mm)	420X146X175	420X196X175	420X246X175	420X296X175	420X346X175
