Reusable for 10 years

With dedicated APP

Customizable Templates

ShowMore APP

ShowMore

- ✔ Template customization function
- ✔ With pre-loaded templates
- ✔ Template management
- ✔ Available in Apple Store and GooglePlay

What are its main advantages?

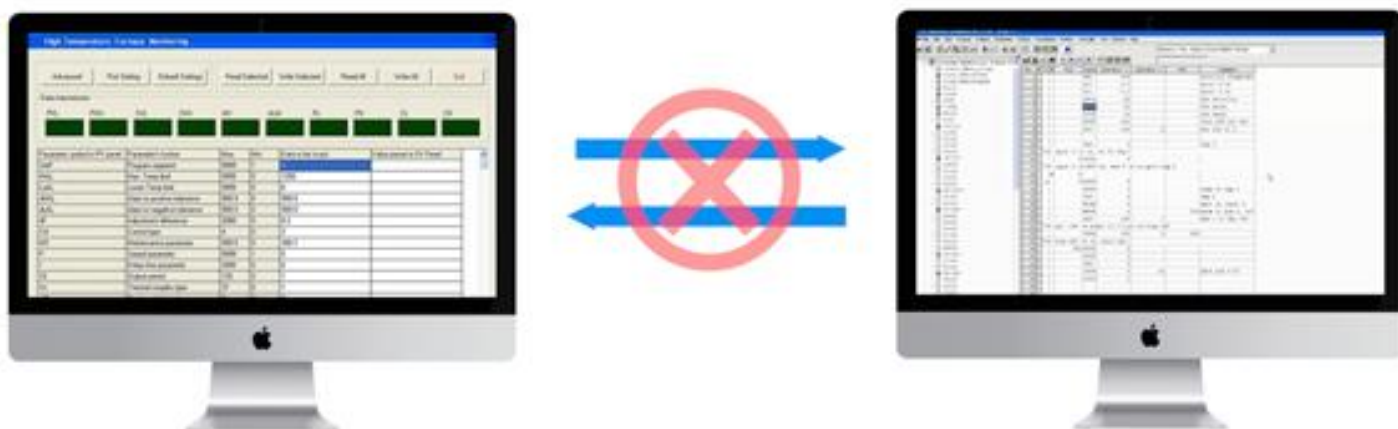

Low cost and TCO (total cost of ownership)

Just use a phone or PDA with NFC to operate the ESL updating task, no need base station, no need server, no need to pay for the annual software costs. Greatly reduce the initial investment.

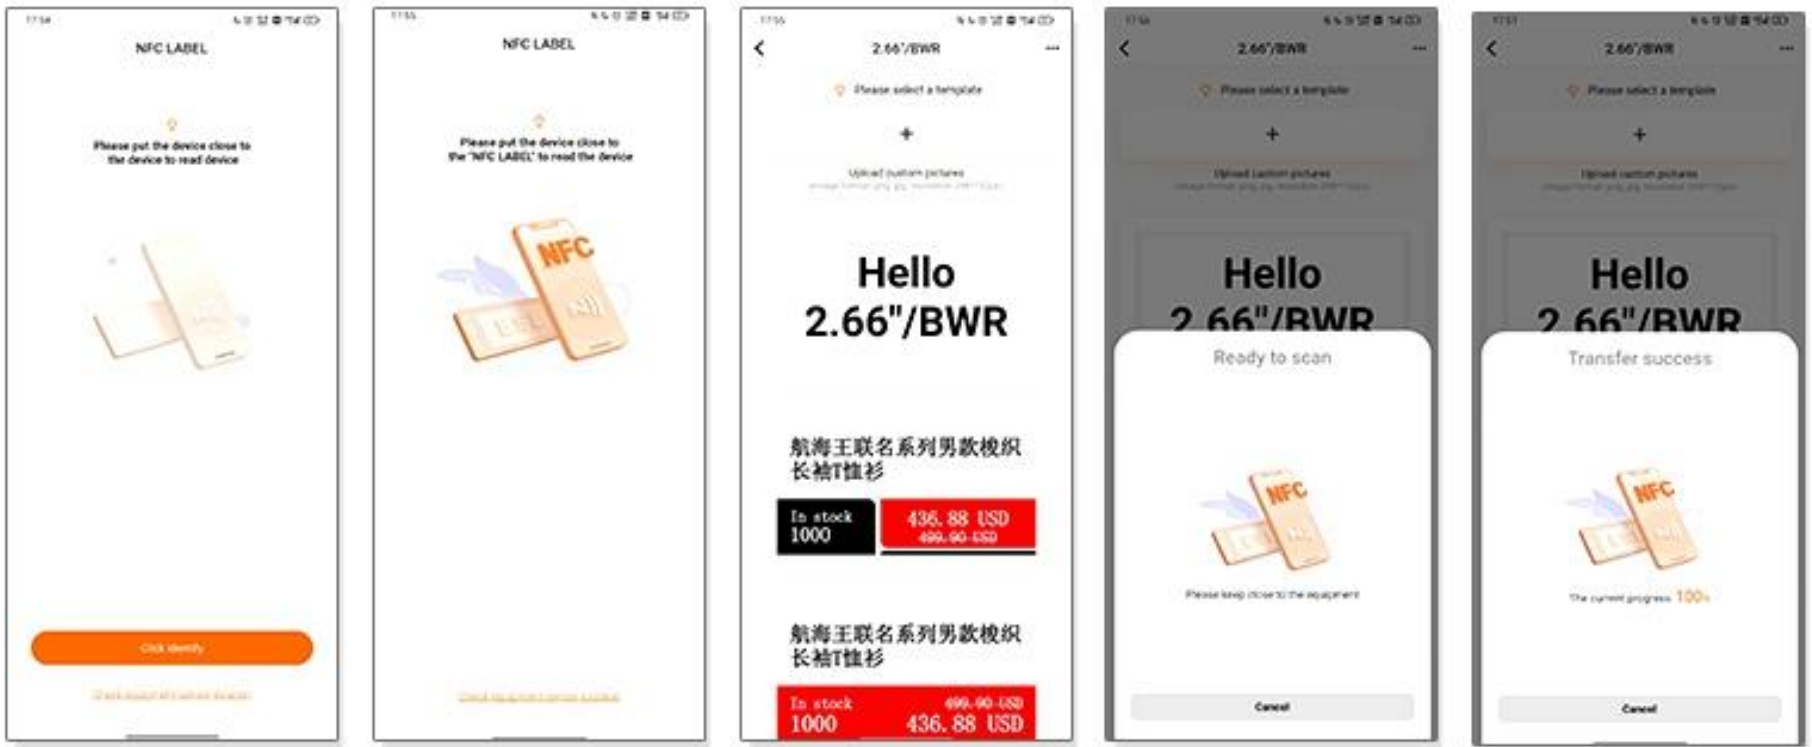

Out of the box, easy to use.

No need training, no need IT skill for the network configuration, no need to use a relatively complex PC software.

How it works?

A new way of using ESL based on NFC technology,
just tap and it changes

STEP 1

Open the APP

STEP 2

Close to the tag

STEP 3

Choose a template

STEP 4

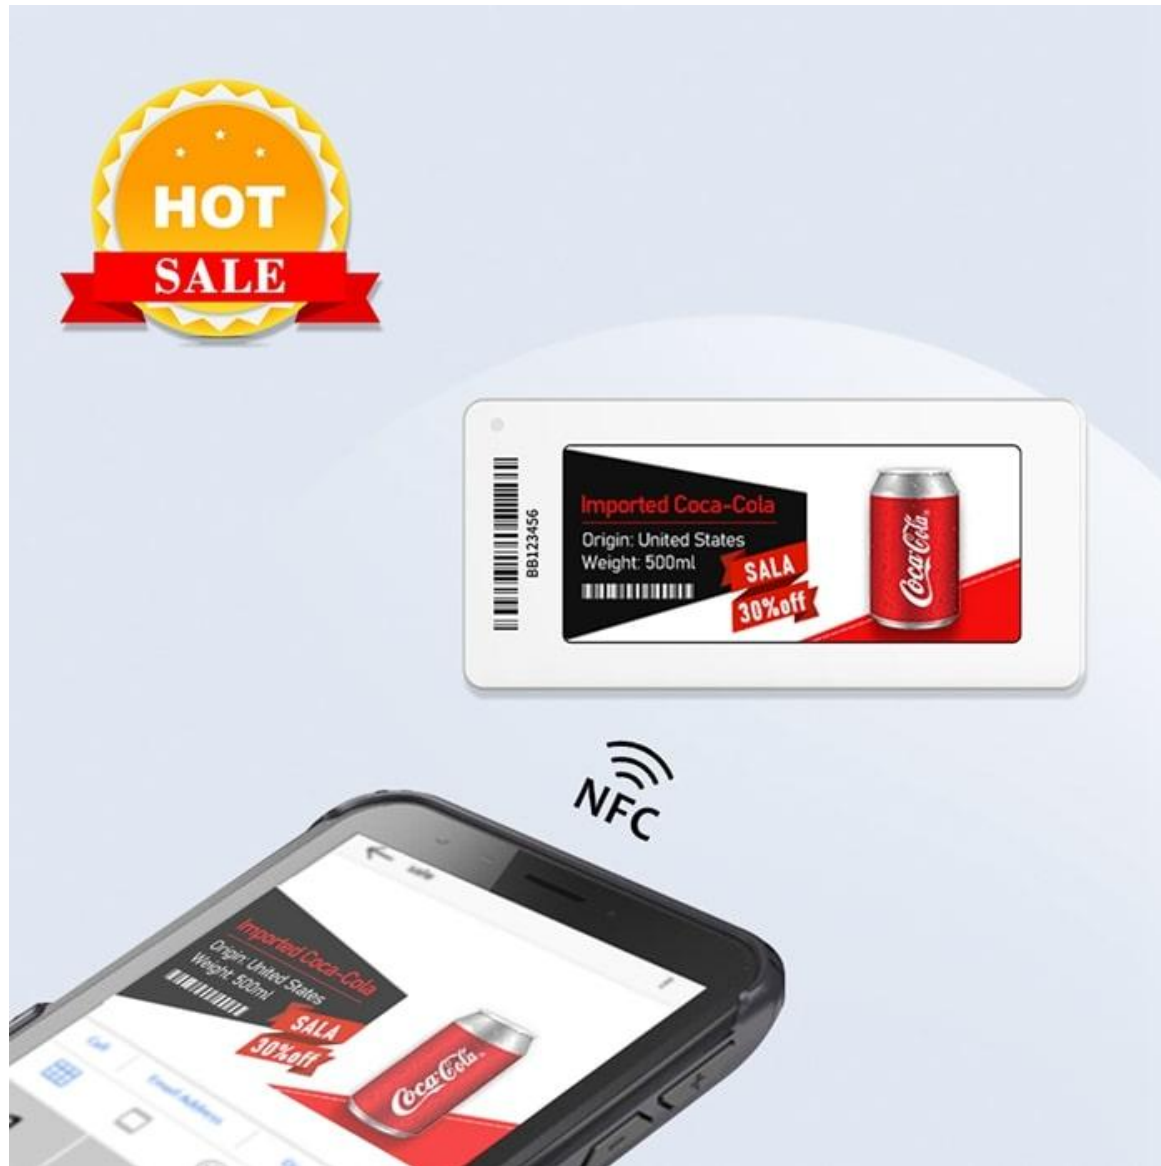

Edit the content

STEP 5

Update successfully

Besides templates, the app enables users to upload image files from mobile phone gallery to the digital labels, the operation steps are similar to the above.

In addition pre-loaded templates, you can create your own template in the app.

2.9 inch model: YL290F

4.2 inch model: YL420F
