

TEST REPORT

Product: lithium battery

Model No.: S2450, NM2450LIT

Applicant: RAY-TECH INTERNATIONAL LIMITED

Address: 423, Overseas Students (Longgang)

Pioneer Park, TengFei Road, LongCheng

Street, LongGang, ShenZhen, China.

518000

Test Sort: Consignment Test

Dongguan NTEK Testing service Co., Ltd.

TEST REPORT

Reference No.....: DGH210421006D

LongCheng Street, LongGang, ShenZhen, China. 518000

Manufacturer RAY-TECH INTERNATIONAL LIMITED

Address.....: 423, Overseas Students (Longgang) Pioneer Park, TengFei Road,

LongCheng Street, LongGang, ShenZhen, China. 518000

Product Name.....: lithium battery

 Model No......
 S2450, NM2450LIT

 Brand......
 LILEAD , Nordmax

Total pages: 11 pages

Standards.....: IEC60529:1989+A1:1999+A2:2013

Degrees of protection provided by enclosures (IP code)

Test items...... IP67

Date of Receipt sample....: 2021-04-21

Date of Test...... 2021-04-21 to 2021-04-23

Date of Issue..... : 2021-04-25

Test Result..... Pass

*Remarks:

The test results presented in this report relate only to the object tested. This report shall not be reproduced, except in full, without the written approval of the issuing testing laboratory. The report would be invalid without specific stamp of test institute and the signatures of tester and approver.

Clause	Requirement - Test	Result - Remark	Verdict
5 5	4 4 4 4 6	7 5 5 5	
14.2.7	Test for second characteristic numeral 7: temporary immersion between 0.15m and 1m	IPX7	F Pot
	The test is made by completely immersing the enclosure in water in its service position as specified by the manufacturer so that the following conditions are satisfied		t Pit
	a) the lowest point of enclosures with a height less than 850mm is located 1000mm below the surface of the water		F 2+
	b) the highest point of enclosures with a height equal to or greater than 850mm is located 150mm below the surface of the water		+ N
4 4	c) the duration of the test is 30min	4 4 4	P
	d)the water temperature does not differ from that of the equipment by more 5K		P
14.2.8	Test for second characteristic numeral 8: continuous immersion subject to agreement		+ Not
14.3	After testing in accordance with the appropriate requirements of 14.2.1 to 14.2.8 the enclosure shall be inspected for ingress of water		+ Port
	It is the responsibility of the relevant technical committee to specify the amount of water which may be allowed to enter the enclosure and the details of a dielectric strength test		t Pot
ين ي	In general, if any water has entered, it shall not:	No any water has entered	Ń
	-be sufficient to interfere with the correct operation of the equipment or impair safety		+ Not
.07	-deposit on insulation parts where it could lead to tracking along the creepage distances	.t .t .t .	+ N
4 4	-reach live parts or windings not designed to operated when wet	x x x x	t N
جن جن	-accumulate near the cable end or enter the cable if any		N
	If the enclosure is provided with drain-holes, it should be proved by inspection that any water which enters does not accumulate and that it drains away without doing any harm to the equipment		t Not

Clause	Requirement - Test	Result - Remark	Verdict
Olddoc	Troquienieni Tost	Tresult Remark	Volulor
	For enclosure without drain-holes, the relevant product standard shall specify the acceptance conditions if water can accumulate to reach live parts	No drain-holes provided	t N
15	Test for protection against access to hazardous parts indicated by the additional letter		Į, N
15.1	Access probes	No additional letter	N
*	The access probe are given in table 6	* * *	+ N +
15.2	Test conditions		N
	The access probe is pushed against any openings of the enclosure with the force specified in table 6		d Not
15.3	Acceptance conditions		N
. O	Test for the additional letter B		N
4	Test for the additional letter C and D		L N L

A.1	Insulation resistance test	+	<u> </u>
- C	Test requirements:	Ç	N
	Immediately after the moisture treatment, the insulation resistance shall be measured with a d.c. voltage of approximately 500 V, 1 min after application of		- A-
	the unit having an insulating cover or envelope shall be wrapped with metal foil.		
4 4	Test result:		4
. ot . k	Between input and enclosure: Max. 100 M Ω > 4 M Ω	七	.0-

A.2	Electric strength test	4	N
	Test requirement:		Ň
sint s	Immediately after the test of A.1, the insulation is subjected for 1 min to a voltage of substantially sine-wave form at rated frequency. The value of the test voltage and the points of application are as following Test result:	et e	Z.Ct
Zillt Z	Between input and enclosure: 500 VDC	Ot .	N.C.
.04	There is no flashover or breakdown occurred.	4	.4

===== End of Test Report =====

STATEMENT

Any objections must be raised to NTEK within 15 days since the date when the report is received.

The test results in the report only apply to the tested sample.

The test report shall be invalid without all the signatures of testing

engineers, reviewer and approver.

This inspection report is invalid without "special seal for testing"

It should not be reproduced except in full, without the written approval of

our laboratory. The copy approved for reproduction shall be sealed and confirmed.

The "*" in the inspection item is the subcontract inspection item.

The remaining samples must be retrieve within three months after

receiving the inspection report. If they are not retrieved after the deadline, our

company will handle them by itself.
