

ESW-450 DISC BRAKE LATHE

Feature

1. ESW-450 adopts the high precision of DC reduction motor and will meet the demanding requirement of industrial motion.
2. The machine is equipped with a twin cutter, which will achieve the simultaneously cutting both sides of the disc and increase the cutting efficiency.
3. The Simple ergonomic controls are designed for minimal operator movement, reducing the operation and easy to learn.
4. The machine is equipped with a big storage cabinet, for the customers to put tools.
5. The machine has small size and solid structure, covering less space.
6. The machine is equipped with the omni-directional wheels to move freely.
7. Two dismountable triangle carbide cutting tips can repair more than 50 discs for customers.

Standard Adapter

No.	Name	Unit	Quantity
1	Twin Cutter Holder	Piece	1
2	Brush	Piece	1
3	Internal Hexagonal Wrench	Piece	1
4	Open-end Wrench	Piece	2
5	Cutting Tip and Screw	Piece	2
6	Spring	Piece	1
7	Wide Silencing Belt	Piece	1
8	Narrow Silencing Belt	Piece	1
9	Screw	Piece	1
10	Long Sleeve	Piece	1
11	Internal Hexagonal Screw	Piece	4
12	Clamp (150mm)	Piece	1
13	Clamp (136mm)	Piece	2
14	Clamp (120mm)	Piece	2
15	Taper Cone (100mm-120mm)	Piece	2
16	Taper Cone (80mm-105mm)	Piece	1
17	Taper Cone (65mm-85mm)	Piece	1
18	Spacer	Piece	1

Main specifications

Model	C9335A	Motor	110v/220v 50/60Hz
Disc biggest Diameter	500mm	Reduction Motor Power	400W
Disc biggest Thickness	40mm	Spindle Revolution	0-200RPM
Disc Precision	≤0.01mm	Working Temperature	-20℃-40℃
Desk Height	1200mm	Weight	138kg
