

# ESW-806B+A450 CAR TYRE CHANGER

26" special designed working plate

Oil-water separator for exporting

Pneumatic locking

Connector

Stainless steel working head

Optional single intake cylinder

## Features:

- 1.Product features: adopting semi-automatic lateral swinging arm and two-sides helper to change tyres.
  - 2.Adjusting mobile slider to be suitable for different rim ranges.
  - 3.The motion structure of the four automatic alignment gripping jaws on the turn plate is link mechanism, which has synchronizing function and fix center automatically when gripping from outside to inside.
  - 4.The once forming mobile slider and the design of processing machinery structure made it not easy to deformation.
  - 5.When the machine is running, the noise is low.
  - 6.It has good personal presentation, thick steel plate and super strong rigidity.
- Machine quality: This product gained Europe CE certification.

## Technical parameter

Rim clamp from outside	12" -24"	Voltage	380V/220V/110V
Rim clamp from inside	14" -26"	Power	0.75kW/1.1kW
Max. wheel diameter	1180mm	Packing size	1120x860x870mm
Max. tire width	3" -14"	Net/Gross weight	251kg/279kg
Working pressure	8-10bar
