

# ESW-60C CAR WHEEL BALANCER

Control panel

Cone storage handle

Optional hood

## Features:

1. This product makes fine adjustment for tyres of various light vehicles.
2. It can realize automatic dynamic balance, static balance and aluminum alloy rim balance.
3. Adopting pressure sensor, pressure data show high precision.
4. The protective cover is optional.
5. This product gained Europe CE certification.

## Technical parameter

Rim diameter	10" -24"	Rotation speed	200r/min
Max. tire diameter	1000mm	Balance precision	± 1g
Tire width	1.5" -1.6"	Motor	110V/220V 250W
Max. tire weight	70kg	Machine weight	93kg
Packing size	950x860x1050mm	Gross weight	128kg
