

EB Dalong Pattern Film Series

High Gloss × Texture × Touch, Elevate Your Decoration Style!

Raw Material

The base film adopts metallic shiny film, featuring a unique metallic color with true hue and uniform luster.

EB Technology

The surface performance is upgraded in multiple aspects—anti-fingerprint, stain-resistant, wear-resistant, Eco-friendly.

Technical Barrier

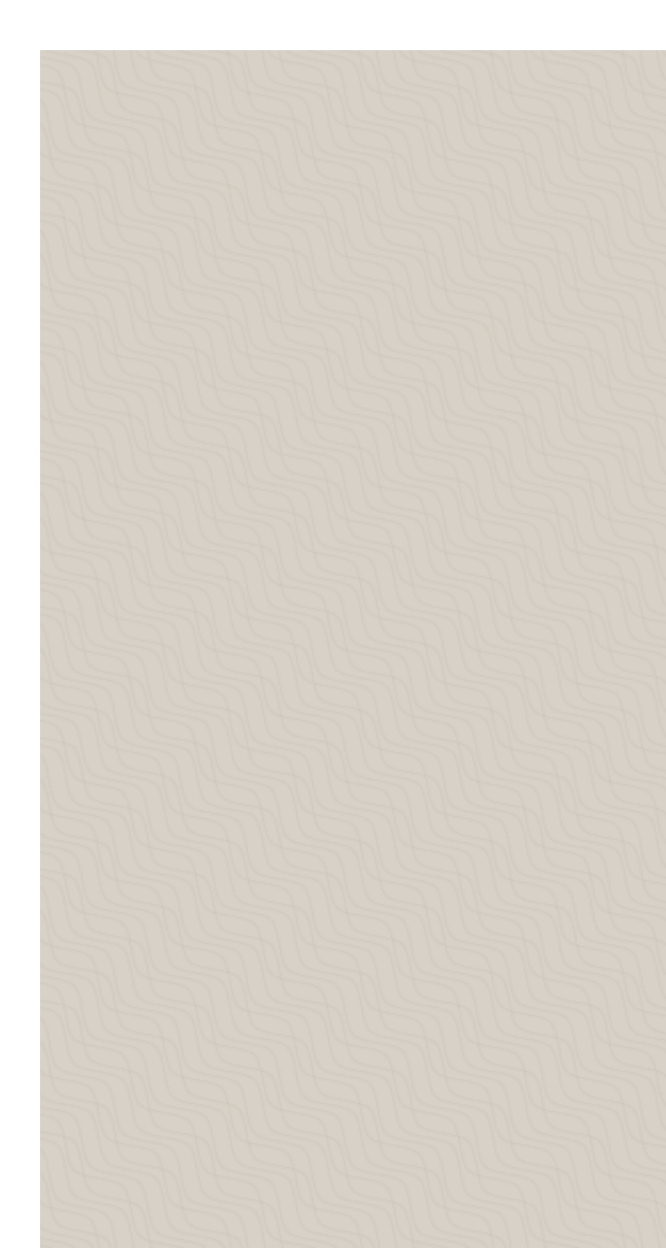

Intelligent printing technology is applied on the raw material, matching with the metallic shiny film to form the same color with different textures, becoming an exclusive advantage.

Unique Texture

Dragon pattern lines flow with light and shadow. High-gloss and matte lines interweave light and dark, creating a distinct three-dimensional visual contrast with strong impact.

Tactile Sensation

High-gloss lines feel smooth with natural luster; matte lines feel soft touch.
