BAIANDA

2101 N100 Particulate Filter

Use For

Solids such as those from processing minerals, coal, iron ore, cotton, flour, and certain other substances.

Features/Benefits

* Comfort

BAIANDA's Advanced Electret Media provides a lightweight, easy breathing combination not found in fiberglass containing filters.

* Versatile protection

The 2101 is well suited for a wide range of non-oil based particulate contaminants. Ideal for welding, metal pouring, torch cutting, abatement or as a prefilter for certain chemical exposures.

* Lowest breathing resistance

Patented support structure design provides the lowest breathing resistance.

* Compatibility

The 2101 can be used with BAIANDA's wide variety of half mask designs.

* Exceptional filter efficiency

Passing NIOSH's N-series test criteria, the 2101 N100 filter provides a minimum 99.97% filter efficiency.

* Durability

The unique flexible filter material resists abrasion and wetting.

* Economy

The 2101 is priced competitively with other filters in its class. The 2101 Filter can use more long time in non-oil environment.

Suggested Applications

- * minerals
- * coal
- * iron ore
- * cotton
- * flour
- * certain other substances.

Biological Particles

This respirator can help reduce inhalation exposures to certain airborne biological particles (e.g. mold, Bacillus anthracis, Avian influenza, Mycobacterium tuberculosis, etc.) but cannot eliminate the risk of contracting infection, illness or disease. OSHA and other government agencies have not established safe exposure limits for these contaminants.

Packageing information

- * 2 Pcs / Bag
- * 160 Bags / Box
