

## Windshield Protection Film

Dmis Clear Plus Winshield Protection Film is a clear breakthrough in windshield protection films, greatly enhancing the strength of your car's windshield against flying stone chips, cracks and other unpleasant surprises you may encounter on your drive.

### PERFORMANCE DATA

Property	Unit	Value	Tolerance
Visible light Transmittance (VLT)	%	91.1	+2
UV Rejection (UVR)	%	99.3	+1
Total Thickness (without R/F)	um	120	+3
Haze (without R/F)	%	0.8	+0.3
Adhesive peel strength	gf/inch	340	+150
Contact Angle	degree	105	+2
Break Strength	N/10mm	139	+20
Elongation at break	%	150	+10

#### Characteristic 1: Crystal Clear

Boasting a thickness of 4mil or 5mil, impacts that would shatter an unprotected windshield leave only a minimal pin-point on the film, preserving its optical clarity.

#### Characteristic 2: Glaring Omissions

Reducing glare from blinding unlight and highlight, allowing you to see better and concentrate more on driving.

#### Characteristics 3: Impact Resistance

Provides superior protection for windshields against high-speed debris, impacts, abrasion and environmental contaminants.
