PE UD fabric, also known as PE weft free fabric, is a bulletproof material with the highest strength and lightest specific gravity, which is made by using ultra-high molecular weight polyethylene fibers as the substrate, impregnating high-strength elastic resin through equipment stretching, and bonding with the film. It is then subjected to $0^{\circ}/90^{\circ}$ orthogonal composite lamination. It has excellent properties such as soft hand, low density, abrasion resistance, impact resistance, cutting resistance and toughness. The products are widely used in soft bulletproof vests, lightweight bulletproof helmets, lightweight bulletproof armor plates, stab resistant and other products.
