

Fruit and vegetable half machine

Product Parameter

| | | | |
|--------------|----------------------------------|-----------------|-----------------|
| product name | Fruit and vegetable half machine | Knife diameter | 750MM |
| Power | 1.8KW | Knife thickness | 5MM |
| Voltage | 380V | Size | 2000*1300*900MM |

Product Parameter

Driven by the belt, under the rotation of the wheel knife, the winter melon and cabbage are cut from the middle to achieve the purpose of cutting half, and the cutting is uniform and no cost. The whole vegetable is transported by conveyor belt

Jx-nc 120 double head vegetable cutting machine

Product Parameter

| | | | |
|--------------------------|--|-------------------------------|-----------------|
| Product model | JX-CNC 120 double-head vegetable cutting machine | The size of the whole machine | 1420*650*1080MM |
| Work by pressing | 220V/380V | Product power | 2.4KW |
| Cutting range | 1-60MM (ADJUSTABLE) | Belt width | 120MM |
| The whole machine weighs | 210KG | Product output | 500-1800KG |

Leaf vegetables or long strips of vegetables can be cut, shredded, chopped. Root vegetables can be diced, sliced and shredded. A multi-purpose machine, high production capacity, complete functions. Ideal for dining halls. Catering distribution center, processing plant use. Touch screen operation, detachable belt, more convenient after sale, health without dead corners.

Jx-nc 120 single cutting machine

Product Parameter

| | | | |
|---------------------------------|-----------------------------------|-------------------------------|----------------|
| Product model | JX-CNC 120 single cutting machine | The size of the whole machine | 980*580*1020MM |
| Operating voltage | 220V | Product power | 1.47KW |
| Cutting range | 1-70MM | Belt width | 120MM |
| The weight of the whole machine | 190KG | Product output | 500-2000KG/H |

Leafy vegetables and long strips of vegetables can be sliced, shredded and cut into sections. Such as cabbage, celery, beans, garlic tomb, spinach, cucumber, etc. are suitable for canteens, catering companies or food processing factories.

JX-801 vegetable cutter

Product Parameter

| | | | |
|---------------------------------|-------------------------|-------------------------------|-----------------|
| Product model | JX-801 vegetable cutter | The size of the whole machine | 1160*530*1270MM |
| Operating voltage | 220V unidirectional | Product power | 3.15KW |
| Cutting range | 1-60MM (ADJUSTABLE) | Belt width | 120MM |
| The weight of the whole machine | 140KG | Product output | 600-1000KG/H |

Cutter size

Random standard configuration: dicing cutter set 15MM, slicing cutter head 3MM, cutting cutter head 3MM
 Slice cutter: 2MM, 3MM, 4MM, 5MM, 6MM
 Cutting knife: 2MM, 3MM, 4MM, 5MM, 6MM, 9MM
 Dicing knife set: 8MM, 10MM, 15MM, 20MM, 25MM, 32MM

product feature

Multi-functional fruit and vegetable cutting machine, can be sliced and diced, suitable for potatoes, radishes, melons and potatoes, carrots, Onions, eggplant, cucumbers suitable for canteen catering companies or food processing plants to use

JX-802 type vegetable cutter

Product Parameter

| | | | |
|---------------------------------|-------------------------|------------------------------------|-------------------|
| Product model | JX-802 vegetable cutter | The size of the whole machine | 1150*600*1140MM |
| For working electricity | 380V | Product power | 3.15KW |
| The weight of the whole machine | 130KG | Yield of leafy vegetables | 500-1000KG/H |
| Yield of rhizomes | 600-1000KG/H | Leafy vegetables cut into sections | 1-60MM (OPTIONAL) |
| Rhizome specifications | (OPTIONAL) | | |

product feature

Random standard configuration: dicing cutter set 15MM, slicing cutter head 3MM, cutting cutter head 3MM
 Slice cutter: 2MM、3MM、4MM、5MM、6MM
 Cutting knife: 2MM、3MM、4MM、5MM、6MM、9MM
 Dicing knife set: 8MM、10MM、15MM、20MM、25MM、32MM

Multi-functional fruit and vegetable cutting machine, can be sliced and diced, suitable for potatoes, radishes, melons and potatoes, carrots, Onions, eggplant, cucumbers suitable for canteen catering companies or food processing plants to use.

JX-702 type vegetable cutter

Product Parameter

| | | | |
|---------------------------------|-------------------------|-------------------------------|-----------------|
| Product model | JX-702 vegetable cutter | The size of the whole machine | 1160*530*1000MM |
| Operating voltage | 220V unidirectional | Product power | 3.15KW |
| Cutting range | 1-60MM (ADJUSTABLE) | Belt width | 120MM |
| The weight of the whole machine | 140KG | Product output | 600-1000KG/H |

product feature

Leaf vegetables and long strip vegetables can be sliced, shredded, cut. Such as cabbage, celery, beans, garlic, spinach, cucumbers, etc., suitable for agricultural processing industry, food processing plants, schools, etc.

JX-510 Vegetable cutting machine

Product Parameter

| | | | |
|---------------------------------|---------------------------------|-------------------|-----------------------------|
| Product model | JX-510vegetable cutting machine | Yield of rhizomes | 600-1000KG/H |
| Product power | 1.5KW | Dice size | 6/8/10/12/15/20MM(OPTIONAL) |
| The weight of the whole machine | 72KG | Shred bulbs | 2-10MM (OPTIONAL) |
| Product dimensions | 690*540*880MM | Rhizome slices | 2-10MM (OPTIONAL) |

product feature

Can be root vegetables: such as potatoes, peppers, leeks, Onions, and fruits, such as slices, strips, cubes small size, light weight, put on the table can be used, is one of the essential supporting materials in the cafeteria, restaurant and other fields.

JX-20 type vegetable cutting machine

Product Parameter

| | | | |
|---------------------------------|-------------------------------------|-------------------------------|----------------------|
| Product model | JX-20type vegetable cutting machine | The size of the whole machine | 540*430*610MM |
| Operating voltage | 220V | Slice size | 2-8MM (CUSTOMIZABLE) |
| Product power | 240W | Shredded size | 2/4/5/6/8/9MM |
| The weight of the whole machine | 35KG | Cut size | 8/10/12/20/25/30MM |

product feature

Can be root vegetables: such as potatoes, peppers, leeks, Onions, and fruits, such as slices, strips, cubes small size, light weight, put on the table can be used, is one of the essential supporting materials in the cafeteria, restaurant and other fields.
