## ABOUT BENTSAI

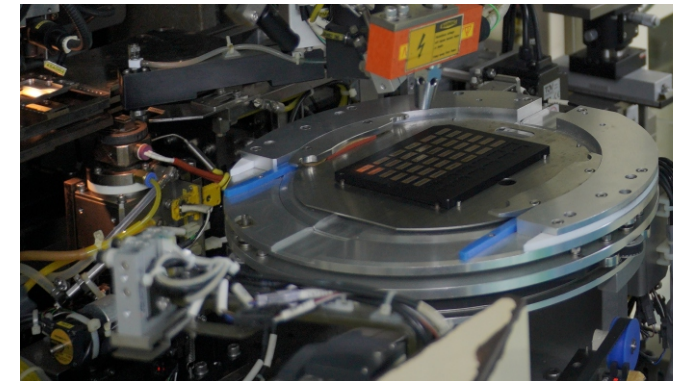

### Originated from Taiwan, Headquartered in Zhuhai with a Global Presence

Bentsai has its origins in Taiwan and is headquartered in Zhuhai, China, with a global presence. Bentsai is an industry-leading manufacturer of coding machines, dedicated to the development and industrial application of thermal inkjet printing technology for coding and marking in the packaging industry. Bentsai's printer portfolio includes two series of handheld and inline printers, providing industrial users with flexible, cost-effective, and easy-to-maintain solutions for product identification and traceability.

### In-house TIJ printheads and cartridges production

Bentsai is a pioneering company in Mainland China that specializes in developing and producing thermal inkjet printheads using advanced microfluidic MEMS technology. These printheads are essential components of inkjet printer cartridges. We are proud to be the first company in China to achieve mass production of thermal printhead chips and cartridges, positioning us at the forefront of industry innovation.

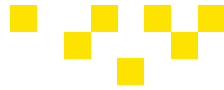

### Vertical manufacturer of printer software and hardware

Bentsai excels in comprehensive software and hardware development for inkjet printing devices. Our expertise includes hardware design, Linux-based printing operating system development, printhead and ink formulation matching, and chip encryption algorithm research. With these capabilities, we offer customized solutions for inkjet printer printheads, coding printers, and specialized inkjet printers, ensuring we meet the unique requirements of our esteemed customers.

### Passion and Expertise in the Coding & Marking Industry

Situated in Zhuhai, a global hub for printing equipment, Bentsai boasts a team with extensive industrial experience, with most members having nearly 20 years of expertise. We exhibit a fervent passion for the inkjet printing industry and prioritize product innovation and customer satisfaction. Our ultimate objective is to establish a renowned global brand of inkjet coding solutions, and make valuable contributions to the expansion of the packaging industry.

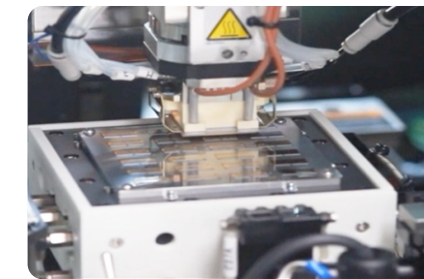

## Production Line for TIJ Printheads

- The first mass-production line for TIJ thermal inkjet printheads in China.
- Capable of manufacturing & customizing inkjet printheads.
- Annual production capacity 3 million pcs printheads.
- Equipped with high-precision & advanced manufacturing equipment.

BC800B presents a cutting-edge solution for industrial and handheld TIJ inkjet printing. It allows longer de-cap time, performs better printing quality, and significantly reduces nozzle clogging and maintenance requirements.

BC800B black solvent-based ink is specifically formulated for traceable coding and marking, as well as other packaging printing applications. It requires very little maintenance and delivers reliable and consistent print performance.

BC800B ink performs well on various semi-porous and non-porous substrates, such as metal, PET, PP, PE, OPP, and aluminum foil. Its impressive de-cap time makes it perfect for intermittent print applications.

Part Number	BC800B	Cartridge Type	TIJ ink cartridge without smart chip
Color	Black	Ink Throw Distance	2-5mm
Ink Type	Solvent-based Ink	Ink Fill level	42ml
Resolution	Up to 600 dpi (recommended 300x300 dpi)	Average Delivered Ink	35ml(Vertical) 33ml(Horizontal)
Max Print Swath	12.7mm	Average Drop Volume	37pl
Nozzle Count	300	Max. Firing Frequency	12kHz
Firing Voltage	8.8V (*Please conduct test before use, the suitable parameter may be different depending on the printer)	Shelf Life	9 months from ink filled date
Firing Pulse Width	1.8 μs	Operation Conditions	15°C to 35°C , 35% to 80% RH
De-Cap Time	8 Hour and above under normal condition and environment (*The actual toleration depends on the surrounding temperature and humidity)	Shipping/Storage Conditions	5°C to 40°C , 20% to 80% RH
Ink Dry Time	4-5 seconds (set for 300x300 dpi, 2.5 mm font) 8-10 seconds (set for 300x300 dpi, 12.7 mm font) (*The printing test results on aluminum foil packaging bags. However, the actual dry time depends on different substrates)	Printhead Cleaning	Wipe lightly with lint-free dry cloth or IPA ethanol-contained cloth.DO NOT USE WATER.

# BC300B

Water-based black pigment ink  
for printing on semi-porous and porous substrates

✓ Exceptional print quality with sharp details and improved adhesion

✓ Rapid absorption and fast drying, particularly for semi-porous substrates

✓ Perfect for both matte and glossy-coated labels and cartons

## Media Coverage

Glossy labels

Coated cartons

Textiles

Foam containers

BC300B is designed for high-resolution printing of small characters, barcodes, 2D codes, images, and more at high speeds on semi-porous and porous substrates.

Its quick drying time on various materials guarantees reliable and consistent high quality industrial codings, requiring minimal maintenance between print jobs.

## BC320B Refillable Cartridge Set for Timber Marking Industry

Refillable kit for up to 5 uses

BC320B economic refilling kit is specially designed for the timber marking industry, offering lower printing costs, fewer nozzle clogs, lower maintenance frequency, and more stable production assurance.

## BC330B Invisible Ink Cartridge for Timber Marking Industry

Eco-friendly, odorless, invisible anti-counterfeiting

BC330B industrial-grade invisible anti-counterfeiting inkjet cartridges are tailored for the timber marking industry. They provide lower printing costs, reduce nozzle clogs, lower maintenance frequency, and ensure more stable production

## BC310B Ink Cartridge for Garment Plotter

Specially developed inkjet cartridge for plotters

✓ Self-produced printhead, sharp and clear printing

✓ Customizable chip encryption for plotter manufacturers

✓ Professional ink for smooth printing and high density

✓ Affordable alternative to brand cartridges

BC310B innovative industrial-grade TIJ cartridges with fewer nozzle clogs, lower maintenance frequency, and more stable printing assurance.
