

ICECON ICO300 Dry Ice Plastic Container

Product Features:

1. PE material is selected, which is non-toxic and harmless, UV resistant and not easy to fade.
2. The container is equipped with wheels, two of which are brake universal wheels for easy box movement
3. The rubber buckle and overall handle make the box lighter and more portable.
4. The body and cover of the insulated box are made with the process of rotational molding. The box is firm and durable, which is extremely suitable for use under poor environments such as long period of high temperature and load carrying.
5. To maintain the temperature change in the plastic container, Aerospace PU filling insulated material is adopted.
6. It's suitable for long-period refrigeration and preserving of dry ice.

Technical parameters:

1. External size(L×W×H):
1090×690×1000mm
2. Internal size(L×W×H): 928×530×644mm
3. Net weight: 64KG
4. Volume: 315L

Temperature test chart: Ambient temperature: 24-28°C Load: 3mm dry ice pellets

Dry Ice Weight (KG) Volatilization rate: 5.35%
