

UV PORTABLE LASER MARKING MACHINE

Introduction

The mechanism is smaller and the whole is lighter; One-piece design, mechanical structure stability, Strong resistance to external temperature interference, Can operate stably for a long time.

Parameter

Selectable power	3W/5W		
Laser wavelength	355nm	Frequency range	20-100KHz
Marking speed	< 6000mm/s	Cooling method	air cooling
Optional marking	100×100mm-150×150mm	Electricity	110V/220V 50Hz
Total power	500W	Table size	450mm×320mm
Machine size	320mm×549mm×668mm	Weight	30kg

There is a certain error in the size and weight of the wooden box packaging, please refer to the actual product.

Application

Suitable for most plastics, leather, glass, ceramics, jade, crystal, metal plating and other materials.
