

Title: Guidelines for Hanging Picture Tiles Using Removal Tape

Prepare the Wall:

Ensure the wall surface is flat and clean before starting the hanging process.

Remove any dust, dirt, or debris that might affect the adhesion of the removal tape.

Remove Protective Film:

Peel off the protective film from the removal tape that is built into the frame back of each picture tile. This exposes the adhesive surface for sticking to the wall.

Determine Placement:

Decide on the position where you want to hang your picture tiles. Take into consideration factors like spacing between tiles, overall arrangement, and alignment with other decor elements.

Hold Frame:

With one hand, hold the picture tile frame in the desired position on the wall. Ensure it is level and aligned correctly with nearby tiles or other reference points.

Apply Pressure:

Using your free hand, press the removal tape firmly against the wall surface. Start from one side of the frame and work your way to the other side.

Apply pressure evenly across the entire frame, focusing on the edges where the tape meets the wall.

Repeat the pressing motion 4 to 5 times, ensuring each press lasts for about 15

to 20 seconds. This helps to activate the adhesive and ensures a strong bond between the tape and the wall.

Complete Hanging:

Once you have applied sufficient pressure, release the frame gently, making sure it remains securely attached to the wall.

Repeat the process for each picture tile, ensuring proper spacing and alignment between them.

Finish:

Stand back and admire your newly hung picture tiles. Enjoy the hassle-free hanging process without the need for hammers, nails, or any other tools.

By following these guidelines, you can efficiently and securely hang picture tiles using removal tape, achieving a clean and professional-looking display on your walls.
