

Echoes of EVADA

ADVANCING, SURPASSING & GROWING

As EVADA celebrates its 27th anniversary this month, we continue to make strides in the energy sector with forefront solutions and a strong commitment to excellence. In this issue, we bring you highlights from the EESA Exhibition in Shanghai, featuring our latest innovations. Additionally, we are excited to share an insightful interview with Mr. Huang, showcasing the future of energy technology. Lastly, we celebrate the 27th anniversary of EVADA company as we look back on this incredible journey. Join us as we move forward in our mission to create a smarter, more sustainable future.

EXHIBITION NEWS

EVADA AT EESA SHANGHAI

This August, with EVADA celebrating its 27th anniversary, our journey has come full circle, from humble beginnings to a trusted global force in intelligent energy solutions. This milestone was marked in style at the 2025 EESA Exhibition in Shanghai (August 14-15), where innovation met reflection, and achievements met aspirations.

A STAGE FOR INNOVATION

PRODUCT HIGHLIGHT:

At the exhibition, EVADA presented its latest solutions in energy storage with **EMP-125KW PCS** as highlight. These products drew considerable attention from visitors, partners, and industry professionals who were eager to learn how EVADA's technology can meet the rising demand for efficiency, resilience, and sustainability in critical applications.

High Protection & Efficient Cooling

With an IP66-rated shell, the system endures harsh outdoor conditions. Natural cooling plus auxiliary fans reduce component wear, boosting conversion efficiency.

Flexible & Reliable

The three-phase four-wire AC design supports 1.1x overload for continuous operation. It handles unbalanced and complex loads, with automatic off-grid/grid-tied switching for power continuity. The DC side supports a 650-1000V range, compatible with 48S/52S 314Ah batteries, and a built-in high-voltage box saves space and reduces costs.

Versatile Energy Storage

Features include anti-islanding, reverse current protection, and black start. Supports AC/DC parallel operation, ideal for diverse commercial and industrial applications.

Recognition and Achievement

The exhibition also brought recognition. EVADA was honored with two prestigious awards: *Best Energy Storage PCS Supplier of 2025* and *Best Emerging Enterprise in the Energy Storage Sector*. These awards stand as a testament to our team's relentless pursuit of technical excellence and our commitment to delivering value to customers worldwide. They also reflect the market's confidence in EVADA's ability to keep innovating as the global energy landscape evolves.

POWER THE AI ERA FORWARD

-A Deep Conversation with EVADA VP Huang Jinguo

Coinciding with the exhibition, EVADA VP Mr. Huang, was featured in a special interview under the theme **Intelligent, Efficient, and Reliable: Powering the Foundation of the AI Era**. As GPU power continues the escalate, reaching megawatt levels, traditional power systems face significant challenges. EVADA's response includes their EPower prefabricated power module, a comprehensive solution integrating medium-voltage distribution, UPS and intelligent distribution to enhance efficiency and reliability. By replacing traditional IGBTs with advanced silicon carbide components, EVADA's system ensures high power efficiency, even meeting the needs of AI workloads.

Mr. Huang highlighted EVADA's focus on high integration, high density, and high efficiency, addressing both space and operational challenges within smart computing centers. With over 20 years of experience, EVADA is also pioneering liquid cooling technology in power systems, ensuring compatibility with modern cooling methods. Looking ahead, EVADA continues to combine digital twin technology and predictive maintenance to further enhance the performance and reliability of its power solutions.

EVADA 27TH BIRTHDAY

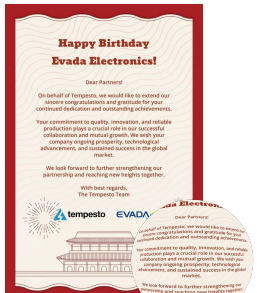

As we look back on the incredible journey so far, we're more excited than ever for the future. With new technologies, bold ideas, and the unstoppable EVADA team, we're ready to continue driving change in the energy world. Let's cheer for the 27th amazing year of advancing, surpassing and growing, and continue to shape a brighter, more sustainable future together.

Since our founding in 1998, our commitment to delivering reliable, efficient, and innovative energy solutions has driven our success. Today, we are proud to be a global leader in the energy sector, and we couldn't have achieved this without the support of our dedicated partners and customers.

One of the key moments in our growth story has been our partnership with Tempesto. Since 2022, Tempesto has played an instrumental role in introducing EVADA advanced technologies to the Russian market. As our exclusive distributor, Tempesto's trust in our products has been a cornerstone of our expansion in this region.

Tempesto recently shared their warm birthday wishes with us, underscoring the strength of our collaboration.

On this special occasion, EVADA extends our heartfelt thanks and appreciation to Tempesto and all our partners. Your dedication, hard work, and unwavering support have been essential to our progress. We are deeply grateful for your ongoing partnership and look forward to continued collaboration and growth in the years to come.
