1 Important Information

1.1 Security

- Before using this smart lock, please read and understand all instructions. Damage caused by failure to follow the instructions is not covered by the warranty
- Suggest using accessories specified by our company
- Only use the lithium battery configured for this product
- Do not disassemble the product forcibly, so as not to sound an alarm or damage the product
- Do not scratch the fingerprint sensor with sharp objects, or it may cause permanent damage
- Do not expose the product to corrosive substances, so as not to damage the protective layer of the shell
- Do not hang objects on the handle, so as not to affect the normal use of the door lock
- To clean the product, please wipe it with a soft cloth
- Do not remove the battery while the device is in operation
- Please choose a professional engineer to install the door lock, and follow the company's installation standards, and do not disassemble or assemble by yourself
- After the door lock is installed and debugged, please modify the default management password set at the factory as soon as possible and keep the mechanical key properly, and do not disclose the password information easily
- After the door lock triggers the low battery alarm, please replace all batteries in time and make sure the installation is correct

1.2 Warning

- Do not put the battery near the fire, so as not to explode
 - Do not use an emergency power source that does not comply with safety regulations to power this product
 - Do not short-circuit the pole connections of the battery leads with metal as this may cause an explosion
 - Make sure to replace by LEELEN, LEELEN authorized service centers or professionals
 - Using accessories or components produced by other manufacturers or not specifically recommended by LEELEN may invalidate your warranty
-

1.3 Disposal Of Old Products And Batteries

- Please understand the local electronic product classification collection system by yourself
- Please follow local regulations and do not dispose of old batteries in normal household waste
- Proper disposal of old products helps avoid potential negative impacts on the environment and human health
- Batteries cannot be disposed of with normal household waste

2.2 Installation Three-dimensional Assembly Drawing

Knowing the three-dimensional assembly diagram of the installation is conducive to understanding the structure of the lock.

1. Door outer lock assembly (1 set)
2. Connecting studs (2 pcs)
3. Square rod spring (2 pcs)
4. Lock cylinder (1)
5. Lock cylinder fixing screw (1 piece)
6. Lock body fixing screws (4 pieces)
7. Lock body (1)
8. Square rod (1)
9. Door lock assembly (1 set)
10. Deadbolt paddle (1 pc)
11. Door inner lock fixing screws (2 pcs)
12. Battery cover (1 pc)
13. Silicone stopper (1 pc)

2.3 Instructions Before Installation

2.3.1 Confirm the door opening direction before installation

2.3.2 Corresponding lock body and bolt direction

2.4 Bolt Direction Reversing

The lock body does not distinguish between push in and pull out. If you need to change the direction (that is, push in to pull out, or pull out to push in), please adjust the direction of the bolt before installation. The specific method is as follows:

- ① The main bolt remains locked
- ② Slightly lift outward, the bolt will automatically pop out of the side panel
- ③ Rotate the latch 180°
- ④ Press the bolt into the side panel after swiveling into position

2.5 Installation Video

During the door lock installation process, it is necessary to try dangerous professional tools, so please be sure to hire a professional to install it. Before installation, please scan the QR code on the right, watch and follow the installation video to complete the installation.

3 Lock Appearance

4 Set Up The Lock

4.1 Change Language Fastly

Long press the **5** key for 10S, the device enters the state of rapid language switching, at this time the voice will prompt "Language switching Settings: English press 1, Vietnamese press 2, Thai please 3, Indonesian press 4, Arabic press 5, hard to hear press #, return press *". The user presses the corresponding numbers 1-5, and it prompts :the operation is successful.

▲ If you have already set the relevant parameters in the device, at this time if you want to set the language, you need to go to the system Settings to switch the language.

4.2 Enter The Management Mode

1.Touch the keyboard area with the back of your hand, the keyboard light will light up, and wake up the keyboard.

2.Press and hold the # key for 2 seconds, enter the management password after hearing it prompt, and press # to confirm.(default password: 951058)

3.After hearing the menu prompt, it means that it has entered the management mode.

Note: If the management password is the default password, it is recommended to modify the management password before performing other operations.

4.3 Add Unlocking Methods

In Management Mode:
When adding a user, the door lock will automatically number the user key, and the user only needs to enter fingerprints, passwords or cards according to the prompts.

Press the **1** key to add fingerprints, and follow the voice prompts to change different angles to enter fingerprints until it prompt: the operation is successful.

Press the **1** key to enter to add a password. After entering the 6-digit password, enter the password again according to the voice ,it prompts: the operation is successful.

Press the **1** key to enter the card adding, put the card in the card recognition area, until it prompts: the operation is successful.

4.4 Delete Unlocking Methods

In Management Mode:

Press the **2** key to delete the unlocking method, enter the user number according to the voice prompt and press # to confirm, until it prompts: the operation is successful.

4.5 Management Settings

4.5.1 Change the management Password

In Management Mode:

Press the **3** key to enter the management settings, and then press the **1** key to modify the management password.

After entering a new 6-digit management password, follow the voice prompts and enter the management password again until it prompts: the operation is successful.

4.5.2 Add the management Fingerprint

In Management Mode:

Press the **3** key to enter the management settings, and then press the **2** key to add the management fingerprints, according to the voice prompts, change the fingerprints from different angles until it prompts: the operation is successful.

4.5.3 Delete the management Fingerprint

In Management Mode:

Press the **3** key to enter the management settings, and then press the **3** key to delete the management fingerprint. According to it prompts, press the # key to confirm until it prompts: the operation is successful.

4.6 System Settings

4.6.1 Volume Setting

In Management Mode:

Press the **4** key to enter the system settings, and then press the **1** key to set the volume. According to the voice prompt, press **1** to set the high volume, press **2** to set the medium volume, press **3** to set the low volume, and press **4** to set the mute. Until it prompts: the operation is successful.

Note: No matter which volume mode is set, the menu indicator sound, alarm sound, and factory reset prompt sound will always maintain a medium volume.

4.6.2 Illegal Input Times Settings

In Management Mode:

Press the **4** key to enter the system settings, and then press the **2** key to enter the illegal unlock times setting. According to the prompt, enter the unlocking times of 5-9, press #to confirm, until it prompts:the operation is successful.

Note: After the setting is completed, if the user fails to unlock for more than the above times, an alarm will be triggered.

4.6.3 Remote Unlocking Settings

In Management Mode:

Press the **4** key to enter the system settings, then press the **3** key to enter remote unlocking setting, press the **1** key to enable it, press the **2** key to close it, until it prompts: the operation is successful. Unlock is enabled by default.

4.6.4 Card Encryption Settings

In Management Mode:

Press the **4** key to enter the system settings, then press the **4** key to enter the card encryption setting, press the **1** key to enable it, press the **2** key to close it, until it prompts: the operation is successful. Encryption is enabled by default.

After opening, the use and entry of the card can be more secure and cannot be copied. If disabled, the security level of the card is reduced, but the applicability is enhanced, such as the door lock can be opened by copying the card through the mobile phone.

4.6.5 Change Language Settings

In Management Mode:

Press the **4** key to enter the system settings, then press the **5** key to enter the language changing setting, and press the 1-5 key to select it, it prompts: the operation is successful.

4.6.6 Residency Alarm Settings

In Management Mode:

Press the **4** key to enter the system settings, then press the **6** key to enter the residency alarm setting, and press the **1** key to enable it, press the **2** key to close it, until it prompts: the operation is successful. Residency alarm is disabled by default.

4.6.7 Demo Mode Settings

In Management Mode:

Press the **4** key to enter the system settings, then press the **7** key to enter the demo mode setting, and press the **1** key to enable it, press the **2** key to close it, until it prompts: the operation is successful.

4.7 Network Configuration Setting

The user can use the LynnSmart APP to bind the lock, so that the lock and the APP can achieve visual intercom and remote unlocking.

Binding Door Locks

RESET 1

Before network configuration, please scan the code to download the APP. After installation, open the APP. For first-time use, please complete the registration. After successful login, select the Smart Home label at the bottom, click the "+" in the upper right corner to add a device, select the smart lock product, find the corresponding product, and follow the APP to perform network configuration operations.

Unbinding Door Locks

RESET 2

Short press the RESET key on the back panel of the lock to enter the distribution network settings. According to it prompts, press 2 key to unbind the door lock, then press # key, the voice prompts "operation successful", you can unbind the door lock and APP.

The door lock currently supports only WiFi routers connected to the 2.4G band (5G band is not supported). It is recommended to ensure that the router is no more than 10 meters away from the door lock (if obstructed will affect the distance).

5 Use The Lock

5.1 Outdoor Locking/Unlocking

Password Unlocking

Outdoor | Front Panel

Touch or swipe the keypad to wake it up, enter the password and press # to confirm. After the verification is successful, please push the handle to unlock within 5 seconds after hearing the door opening prompt

Proximity Card Unlocking

Outdoor | Front Panel

Tap an added card key on the identification area. After the verification is successful, please push the handle to unlock within 5 seconds after hearing the door opening prompt

Fingerprint Unlocking

Outdoor | Front Panel

Put an added finger on the fingerprint recognition area. After the verification is successful, please push the handle to unlock within 5 seconds after hearing the door opening prompt

▲ If the wrong unlocking credentials (password/card/fingerprint) are entered continuously within 5 minutes, the smart lock will be locked for 90 seconds. After successful unlocking, if the door is not opened within 5 seconds, the smart lock will re-lock automatically.

Lift the handle directly outside the door to complete the locking

Outdoor | Front Panel

Press and hold the upper end of the key cover, rotate the cocked part, insert the key into the keyhole and turn to unlock until the bolt is fully retracted, and the door can be opened with a light push.

Mechanical key unlock

Outdoor | Front Panel

5.2 Indoor locking/Unlocking

5.2.1 Locking

Lift the handle to complete the lock

5.2.2 Deadbolt

After the anti-lock knob is turned to the "-" position, push down the handle to unlock

5.2.3 Unlocking

push down the handle to unlock

5.2.4 Unlocking The Lock Indoor | Front Panel

After the deadbolt knob is turned to the "I" position, the deadbolt can be unlocked

6 Other Functions

6.1 Restore Factory Settings

As shown in the figure, after long pressing the RESET button located under the inner lock of the door for 5 seconds, according to the voice prompt, short press the RESET button within 10s until it prompts: "operation is successful", then the factory settings are restored successfully.

6.2 Battery Replacement

When the system prompts "The battery is low, please replace the battery", it is necessary to replace the corresponding part of the battery in time.

6.3 Emergency Power Supply Method

When the battery voltage is insufficient and cannot be opened from the outside, you can open the rubber plug of the power supply port at the bottom of the front panel, connect a power bank to the emergency power supply port (Type-C), and then use your fingerprint, password or card to unlock.

6.4 System Restart

If you need to restart the system, you can use a 5V power bank as an emergency power supply and power on the door lock through the Type-C interface to restart.

7 Basic Parameters

Front panel (L*W*H): 364.5*82*73.1mm
 Rear panel (L*W*H): 364.5*82*72.3mm
 Shell material: aluminum alloy + tempered glass
 Lock body type: 6068 standard lock body/Overlord lock body
 Input power: 4 AA dry batteries
 Emergency power supply interface: Type-C 5V power supply port
 Average power consumption of door lock: ≤35mA
 Standby power consumption: ≤60uA
 Working temperature: -25°C~+70°C
 Working humidity: 0~93%±3%RH, non-condensing
 Protection class: IP52
 User capacity: 100 fingerprint (99+1 management)/
 50 password groups (49+1 management)/100 cards
 Fingerprint recognition speed: 0.5 seconds/piece
 Fingerprint false recognition rate (FAR): ≤0.001%
 Fingerprint rejection rate (FAR): ≤5%
 Number of fingerprint sensor presses: 1 million

8 Restricted Substances

Part Name	Toxic and hazardous substances or elements					
	Pb	Hg	Cd	Cr6+	PBB	PBDE
Metal Parts	○	○	○	○	○	○
Plastic Parts	○	○	○	○	○	○
Board Assembly*	X	○	○	○	○	○
Power Cord/Connection Cord	X	○	○	○	○	○

This form is prepared according to the provisions of SJ/T 11364:
 ○: Indicates that the content of the hazardous substance in all homogeneous materials of the part is below the limit requirement in GB/T 26572
 X: Indicates that the content of the hazardous substance in at least one homogeneous material of the part exceeds the limit requirement specified in GB/T 26572
 *: Circuit board assembly includes printed circuit board and its components, such as resistors, capacitors, integrated circuits, etc.
