LEADING PROVIDER OF SMART INTERCOM

Leelen is a leading provider of smart intercom and smart home solutions, specializes in designing and manufacturing innovative intercom and smart home products. After its establishment since 1992, LEELEN grew from a small business into a large, globally recognized player providing smart intercom and smart home products. Leelen always aims to design and produce accessible and smart intercom solutions, providing our customers with enhanced security and convenience in their daily lives.

With over 30 years of experience in the industry, LEELEN developed a wide range of smart intercom and smart home products, which are built with advanced technology and patents, ensuring superior performance and reliability and stability for global customers. With long-term focus on progressive innovation, stable quality, and reliability from global customers, LEELEN is and will always be your trustworthy partner as smart intercom and smart home solutions provider.

SMART INTERCOM TECHNOLOGIES-ANDROID

Due to the openness and extensive scalability of Android, Leelen's Android-based devices support the integration of third-party systems and apps, allowing your Leelen smart home systems and other third-party systems to seamlessly come together, greatly enhancing the interaction between other systems and Leelen video intercom systems.

SMART INTERCOM TECHNOLOGIES-SECURITY

The Leelen Building Intercom System supports security alarms, allowing you to arm your home with a single button when you leave, providing peace of mind while you are away.

Additionally, the Leelen Intercom supports voice-changing function for additional safety when dealing with unfamiliar visitors. It also features a one-touch SOS function for quickly requesting help in emergency situations.

Leelen has globally deployed data centers, committed to protecting your privacy and security.

GLOBAL TECHNOLOGY PARTNERS

Together with our valued and trusted technology partners, Leelen always aims to create smart intercom and access control solutions that meet our customers' ever-increasing security needs.

LEELEN HOME APP

Leelen Home App is a unified management platform for Leelen IoT smart devices, enabling interconnection and communication between community and home smart devices.

Access Control: Convenient and fast access control terminal.

Video Surveillance: Real-time monitoring of the situation outside the door.

Video Intercom: Stay connected with visitors through cloud-based intercoms even when you're away.

Remote Door Unlocking: Remote door unlocking with just one press of a button.

Smart Linkage: Experience a smart home with seamless integration of Leelen smart home and smart locks, giving you a truly intelligent living environment. In such an environment, you smoothly control smart locks, lights, panels, switches, curtains, aircon panels, and so forth with various functions.

All in One

SMART COMMUNITY PROJECT PLATFORM

Leelen Smart Community and Smart Project Platform are management platforms including a cloud service and a local system, both that integrate devices, communities, personnel, roles, and data. Users can efficiently manage their communities through the platforms.

- Real-time viewing of access control status, managing access control
- Managing community member registration information
- Convenient configuration of community, building, and device information
- Role differentiation, different roles have different operational permissions
- Viewing access control access records

The screenshot displays the 'Smart project platform' interface. The top navigation bar includes 'Basic information', 'Security', 'Services', and 'Device management'. The main content area is divided into several sections:

- Project Management:** A table showing project details for 'alces小区0625'. The table has columns for Project name, Number of buildings, Number of houses, Number of residents, Creator, Creation time, and Operation. The current project shows 0 buildings, 0 houses, and 0 residents, created by 'Super administrator' on '25-06-2024 13:33:20'.
- Smart Community Workbench:** A section with a 'Door status display' dropdown. It contains three main functional cards: 'Household registration', 'Visitor registration', and 'Remote unlocking'.
- Alarm records:** A table listing recent alarm events. The table has columns for Time, Type, Address, Status, and Handle. All listed alarms are 'Device offline alarm' events.

Project name	Number of buildings	Number of houses	Number of residents	Creator	Creation time	Operation
alces小区0625	0	0	0	Super administrator	25-06-2024 13:33:20	Check Edit Map

VILLA SOLUTION

VILLA SOLUTION FEATURES

Users can initiate a visual intercom and unlock functions directly from the outdoor station to the indoor station. Additionally, users can utilize the indoor station to communicate with other indoor stations.

Users can call the indoor station from the outdoor station at the door to unlock the door via a video intercom. Alternatively, they can use an IC card or passcode for access. Additionally, users have the ability to register and cancel IC cards at the outdoor station.

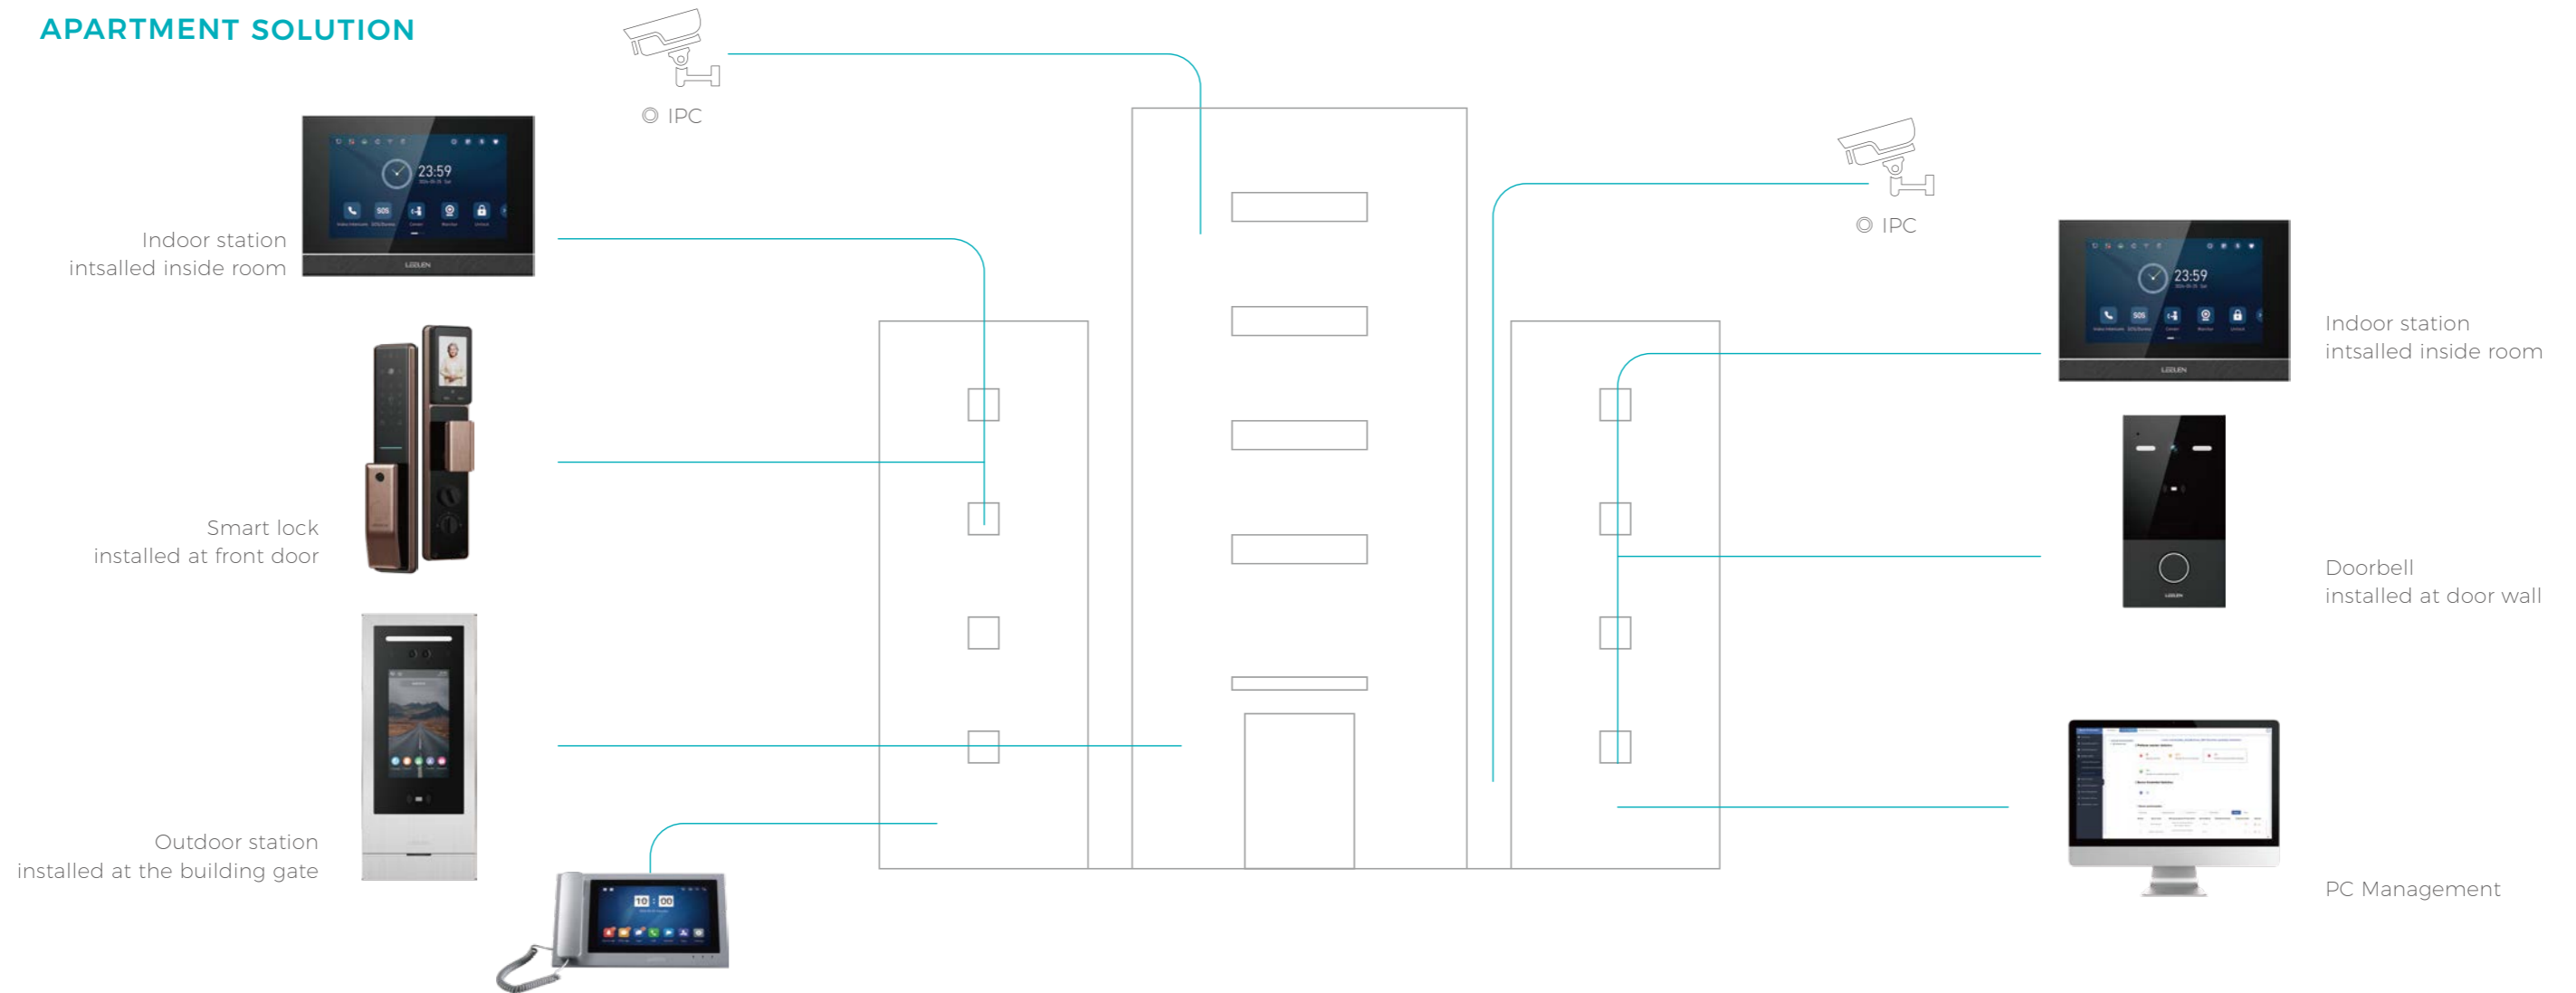

Users can use the indoor station to view the video of the outdoor, as well as a connected IPC.

When a resident is out, if there is an outdoor station call, the user can use talking and unlocking features through the APP.

APARTMENT SOLUTION

APARTMENT SOLUTION FEATURES

ACCESS CONTROL

Users can call the indoor station from the outdoor station at the door to unlock the door via a video intercom. Alternatively, they can use an IC card or passcode for access. Additionally, users have the ability to register and cancel IC cards at the outdoor station.

ELEVATOR CONTROL

When a user initiates a call or uses the card swiping feature to unlock the door, the elevator will automatically arrive at the floor where the outdoor station is located, and access to the floor of the calling indoor station will be authorized. Additionally, users can swipe card in the elevator and then press the corresponding floor button to proceed to their desired floor.

VIDEO SURVEILLANCE

Users can use the indoor station to view the outdoor station video, check the community public IPC video and the IPC video installed at home. Managers can use the guard station to check the outdoor station video and community's public IPC video.

COMMUNITY INFORMATION

Community property managing personnel can send community notification information to one or certain indoor stations, and residents can view and process the information in time.

BUILDING INTERCOM

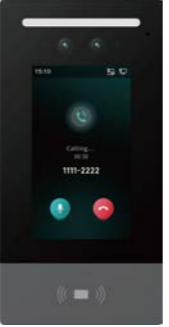

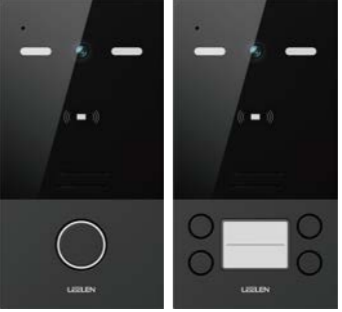

Users can enter the number on an outdoor station to call an indoor station or the guard station to realize the functions of visual intercom, unlocking, and household intercom. Property management personnel and users can also use the guard station for visual intercom.

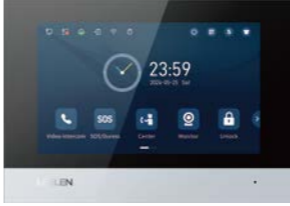

CLOUD INTERCOM

When the user is out, if there is a outdoor station call, the user can use the App for talking and door unlocking.
