Smart Lock Solution

Solution overview

The solution is based on the needs of home users and integrates multiple unlocking methods such as face recognition, fingerprints, and passwords to give you an unlocking experience in more scenarios. It is suitable for the whole family. Users can monitor all activities outside the house through cat eye, video intercom, and App remote control. It has multiple protection functions such as anti-pry alarm and anti-small black box, and thoughtfully protects family safety. A variety of door opening methods and user-friendly networking options meet the differentiated needs of different users, allowing safety and portability to be achieved in one step, allowing smart life to start from the moment you enter the door.

Solution Features

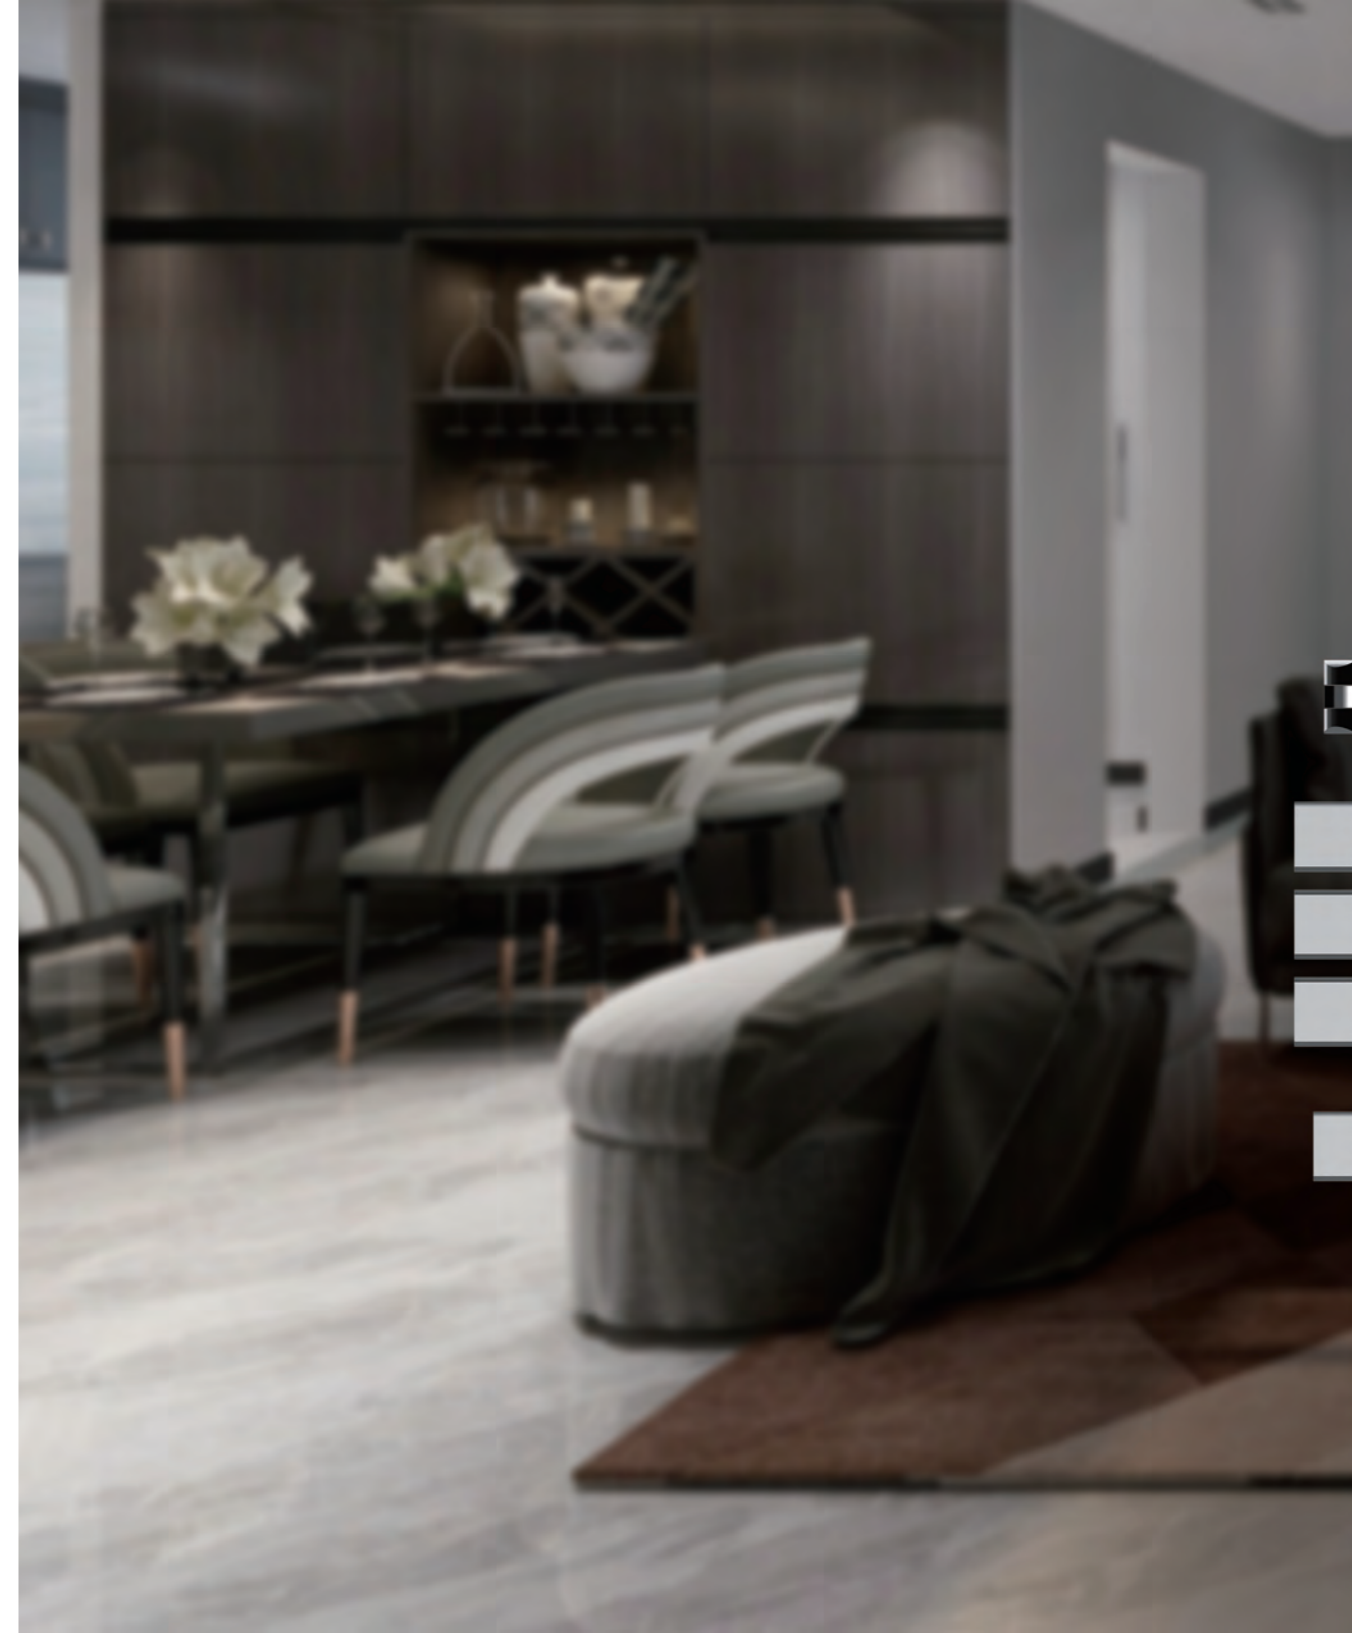

Diversified appearance to meet personalized needs

Diversified functional configurations, supporting on-demand selection

Remote Intelligent Control Type | Visible Cat-eye Type | 3D Face Recognition Type | Video Intercom Type

The solutions are flexible and suitable for the whole family

Face Recognition | Fingerprint Unlock | Password Unlock | Temporary Password Unlock | App Unlock | Card Unlock | Key Unlock

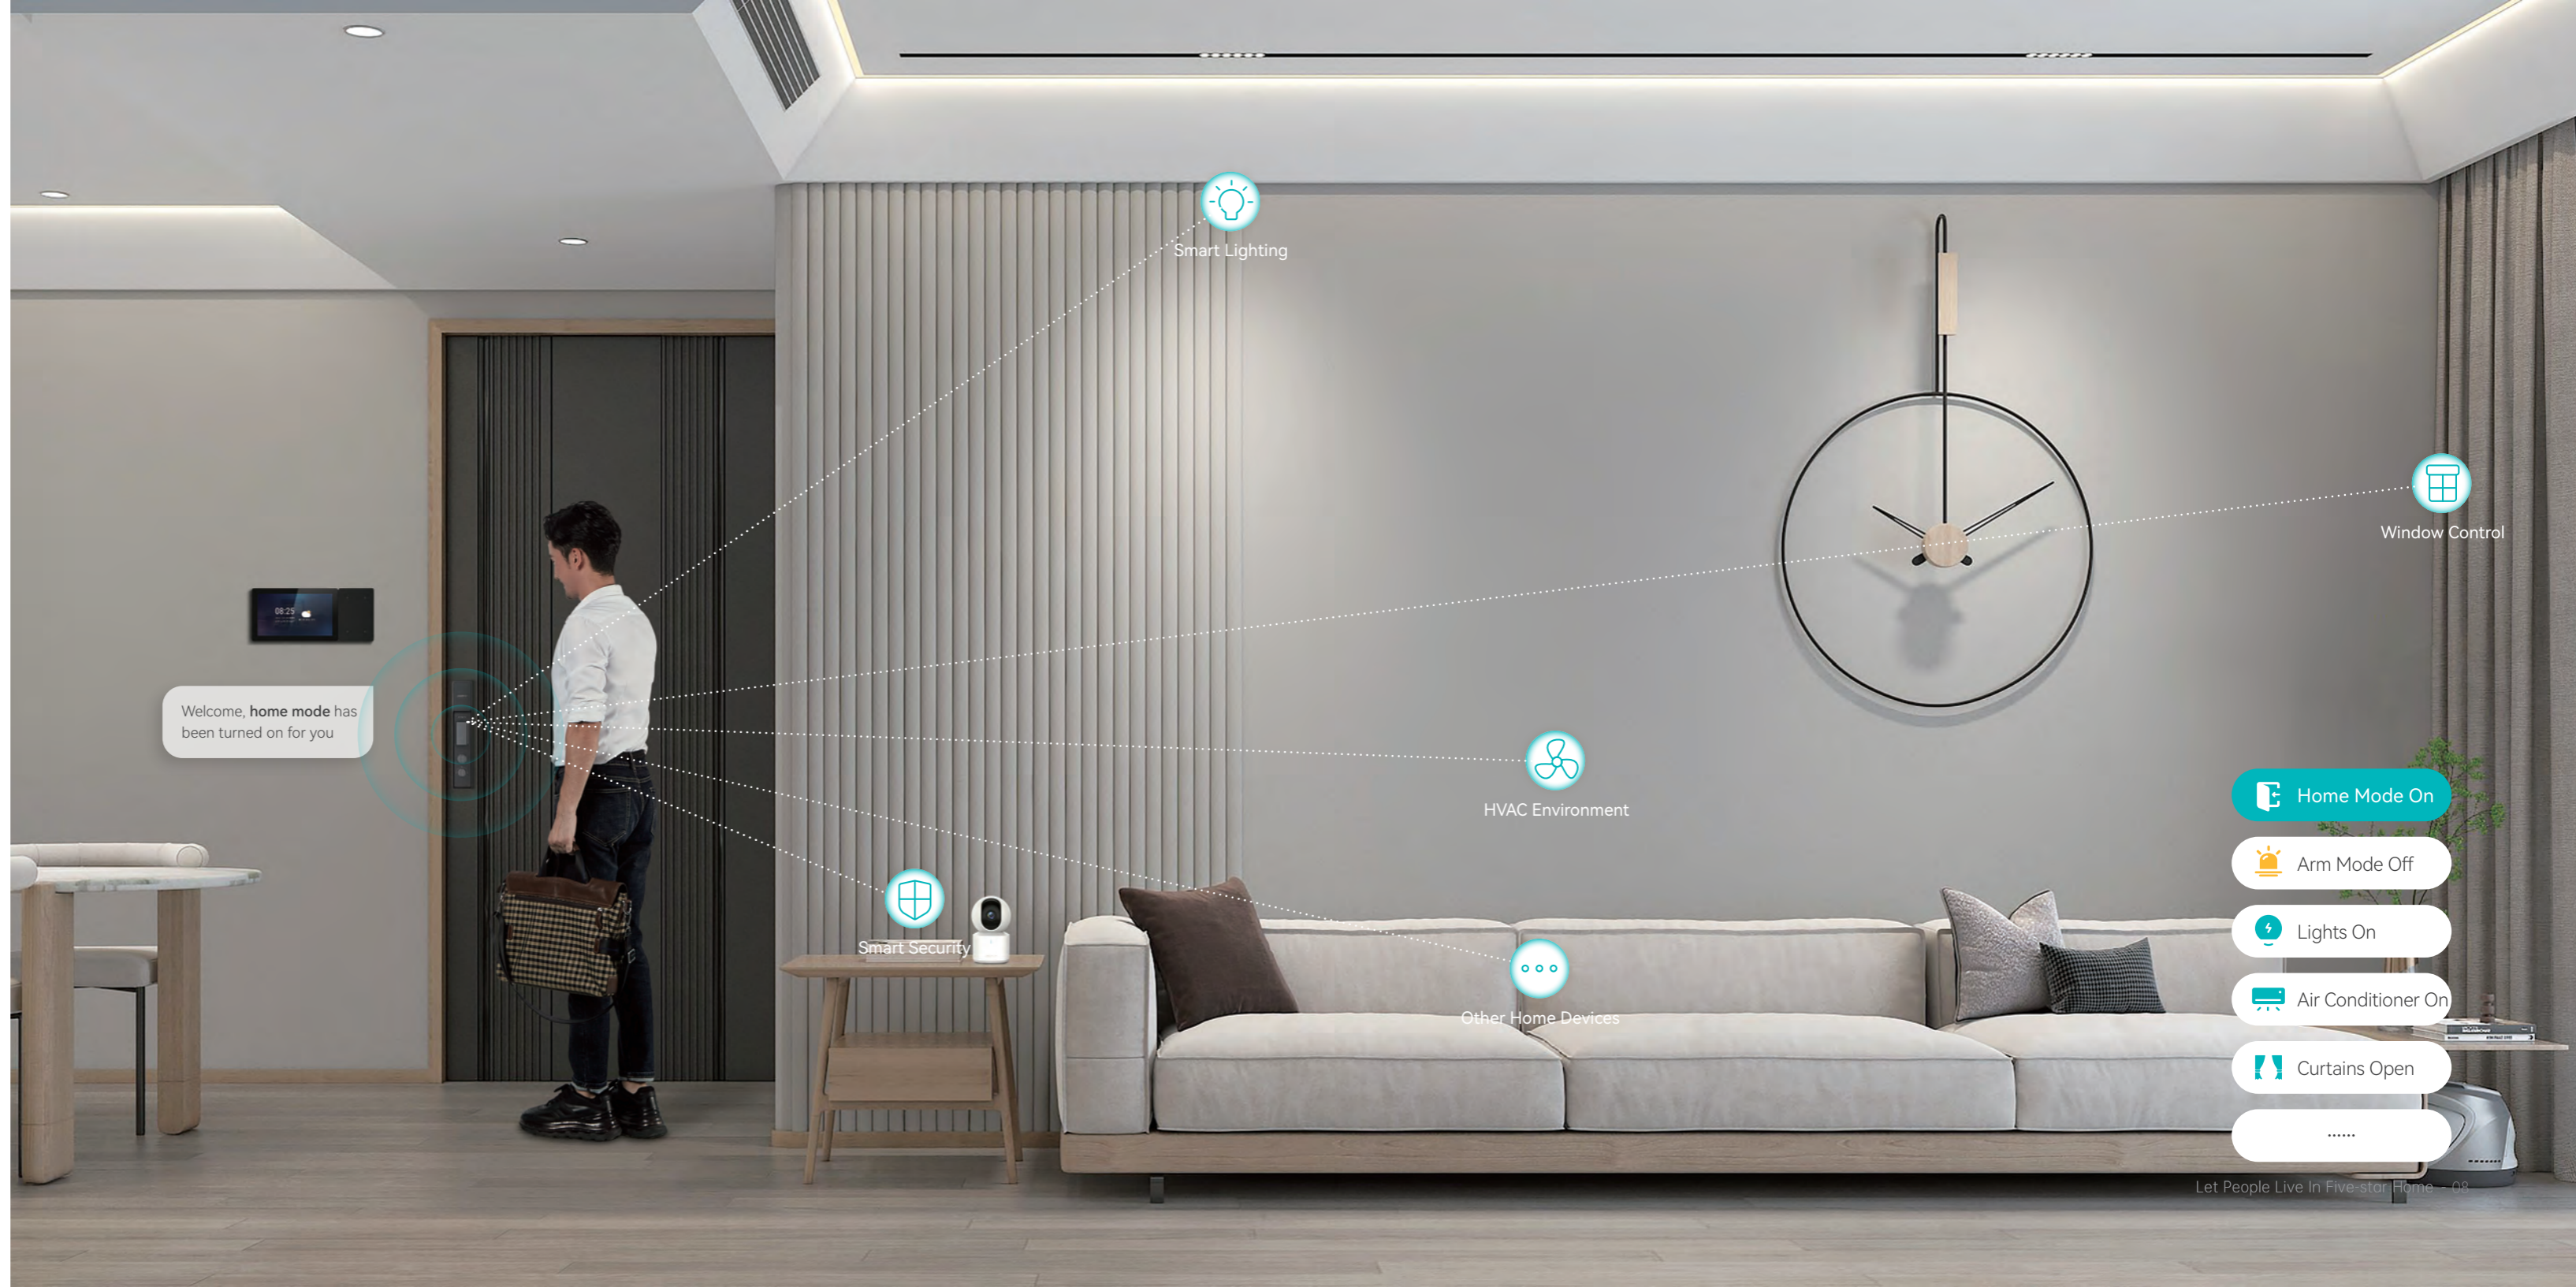

Home Linked

Smart Lock Solution

Program overview

The solution uses smart locks as the entrance devices to smart homes, making full use of Internet of Things, Internet, cloud computing, AI and other technologies. It can be remotely controlled and viewed in real time through mobile phones, allowing you and your home to be connected to the Internet at all times. It supports a large number of ecological smart products, combines with preset smart linkage solutions, and uses smart gateways to intelligently open personalized home scenes when different roles open the door, realizing whole-house intelligence. Make going home more ritualistic and enjoy a comfortable life.

Program Topology

Solution Features

Whole house interconnection, enjoy smart life

Linked with smart home devices, achieve rich linkage effects when unlocking and enjoy a portable and beautiful smart life.

Cloud linkage, remote intelligent control

Remote intelligent control, real-time monitoring, video calls, remote unlocking and other functions can be realized through the Mobile App, and door lock information such as unlocking reminders and alarm notifications can be viewed in real time.

Solution Value

Real Estate

- Increase the added value of real estate and stimulate purchasing desire
- Accurate user data empowers real estate marketing to generate revenue
- Help real estate developers transform into service operators

Residents

- Enrich scene linkage and create smart space
- Improve the happiness and security of life

Smart Intercom Integrated Smart Home

Smart Lock Solution

Program overview

Based on the LEELEN smart community system architecture, the solution builds an integrated linkage ecology of "smart locks + smart communities + smart homes" to achieve one call to the door lock, simultaneous video intercom and unlocking of indoor smart panels, apps, etc., and realize resident alarm and linkage home functions. Lock picking or hijacking alarm information will also be pushed to the property platform and owner App as soon as possible, providing comprehensive security protection for families.

Solution Value

Real Estate

- Increase the added value of real estate and stimulate purchasing desire
- Provide scenario-based services to increase attractiveness
- Accurate user data empowers real estate marketing to generate revenue
- Help real estate developers transform into service operators

Solution Features

Smart Intercom Integrated Smart Home

Industry first, the door lock connects community and home products, and its unique interactive design breaks space restrictions.

Intelligent Full Scene

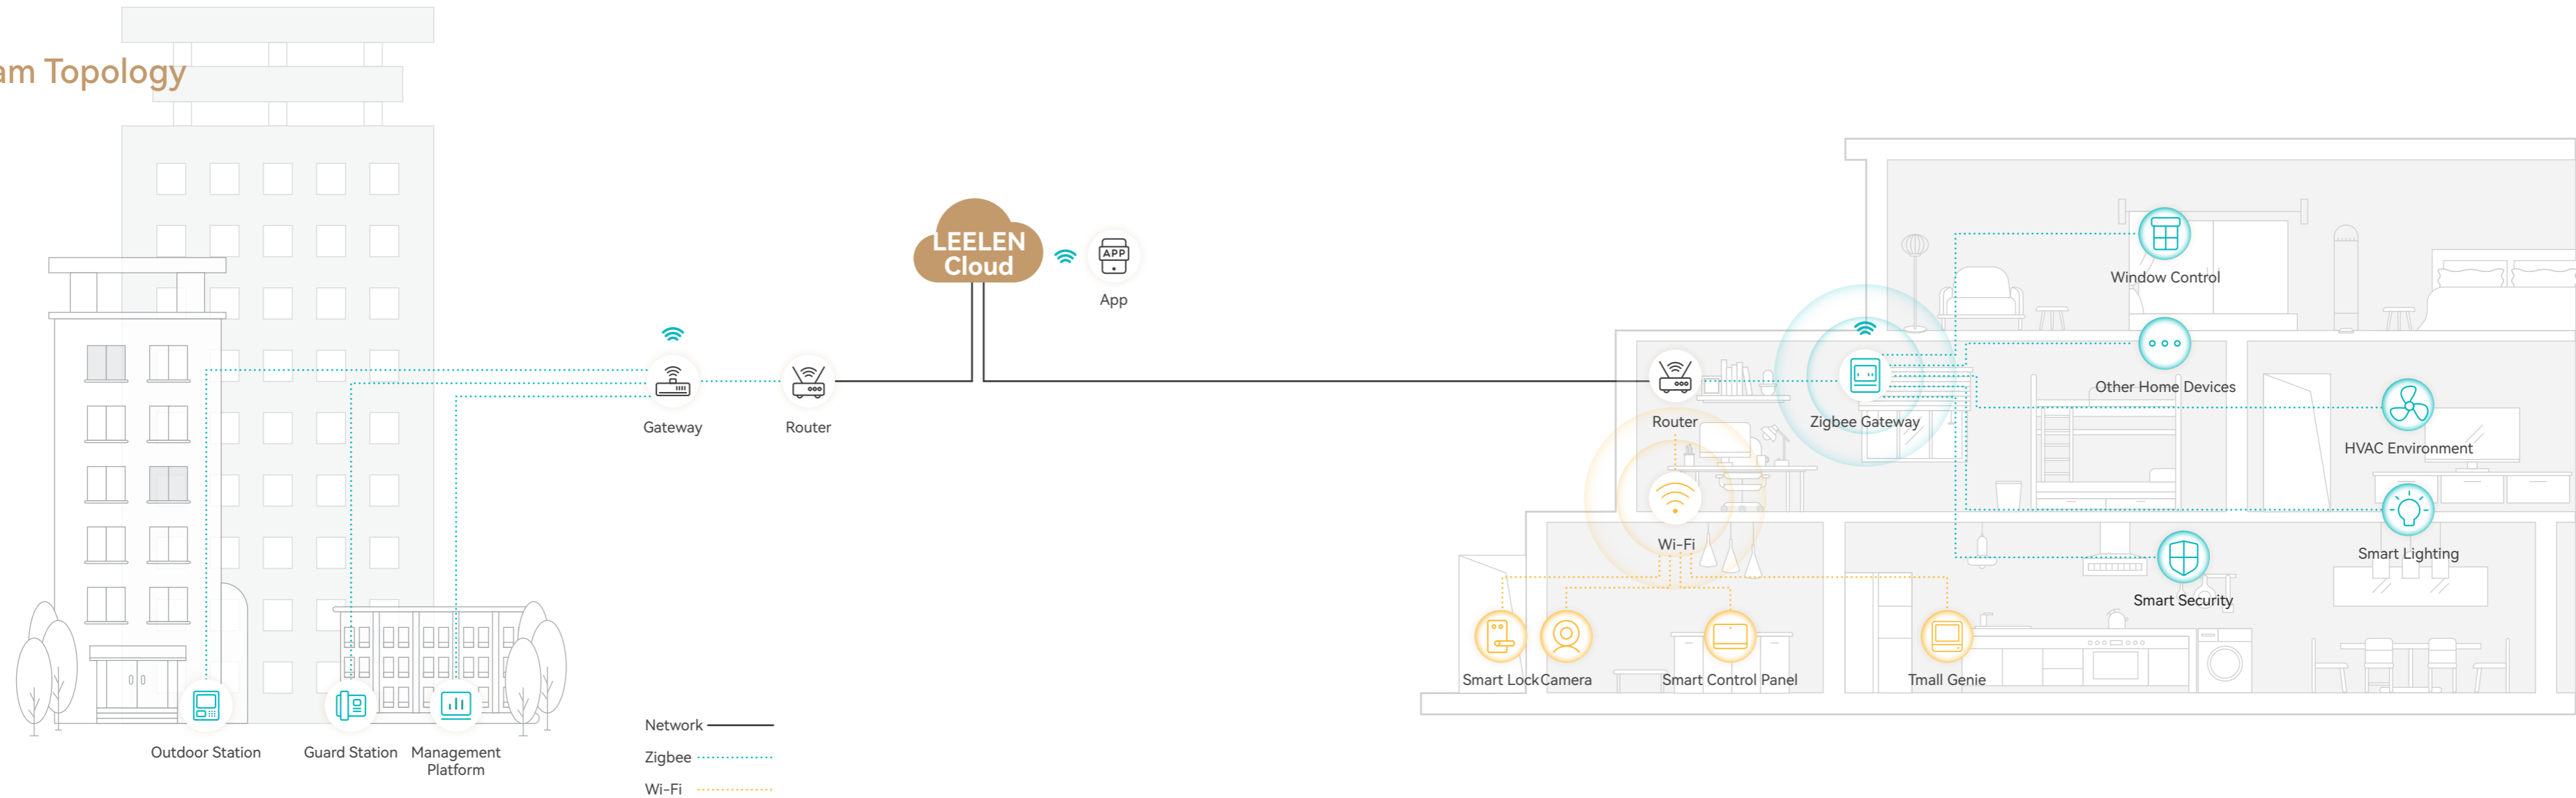

Provide users with an intelligent full-scenario experience from community entrances and family entry door, as well as indoors, making living safer.

Residents

- Enjoy smart life in all scenarios of community and home
- Improve the happiness and security of life
