#### Important safety information

To prevent severe injury or loss of life or property, and to ensure proper and safe operation of your

product, read this section carefully before using the product.

#### Warning

Preventing fire, electric shock, and short circuits

•Leave installation work to the dealer. Installation work requires technical knowledge and experience. Electrical connection work should be performed by certified personnel only. Failure to observe this may cause fire, electric shock, injury, or damage to the product. Consult the dealer.

•Do not place objects on the power cables. Install the product where no one can step or trip on the power cables.

- ·Do not allow the power cables to be excessively pulled, vent or placed under heavy objects.
- •Make sure all connections from the power outlet to the power supply unit are secure.
- •Never touch the power supply unit and power cables with wet hands.
- ·Do not use the power supply unit for outdoor installations (it is for indoor use only).

LCCLEN

•Do not disassemble or modify the product. Refer servicing to an authorised service centre when service is required. Disassembling the product or manipulating the product in a way not described in the documentation may expose you to dangerous voltages and other risks.

•Do not touch the product or the power supply unit during an electrical storm. There may be a remote risk of electric shock from lightning.

·Do not connect non-specified devices.

•When opening holes in walls for installation or wiring, or when securing the power cable, make sure you do not damage existing wiring and ductwork.

·Do not make any wiring connections when the power outlet is turned on.

•Do not install the product and power supply unit in the following places:

- Places where the product and power supply unit may be splashed with water or chemicals

- Places where there is a high concentration of dust or high humidity

·Do not push any objects through the openings of the product.

· If any of the following conditions occur, disconnect the Ethernet (LAN) cable from the product,

disconnect the power supply unit from the power outlet, and then refer servicing to an authorised service centre.

- The product emits smoke, an abnormal smell or makes unusual noise

- The power cables are damaged or frayed
- Metal objects have been dropped inside the product

•Do not use the product in unstable areas or areas prone to strong vibrations. This may cause the product to fall, resulting in damage to the product or injury.

•Always connect power cables to the appropriate connection terminals. Incorrectly connecting the power cables may damage the power supply unit.

•Insert the power cables firmly all the way into the terminals. If the cables are not inserted all the way, heat may be generated.

· If the wiring passes outdoors, use a conduit and a surge protector.

· If the wiring passes underground, use a conduit, and do not make any connections underground.

•Install the product securely adhering to the instructions in this document to prevent it from falling off the wall. Avoid installing onto low-strength walls, such as gypsum board, ALC (autoclaved lightweight concrete), concrete block, or veneer (less than 18 mm thick) walls.

•Do not put your ear(s) near the speaker, as loud sounds emitted from the speaker may cause hearing impairment.

•To prevent serious injuries due to the product unexpectedly falling, the product with a wall mount feature must be installed at a height of 2 m or lower.

#### Privacy

When installing or using the product, please take into consideration the rights of others with regard to privacy and rights of portrait.

It is generally said that "privacy" means the ability of an individual or group to stop information about themselves from becoming known to people other than those whom they choose to give the information.
"Rights of portrait" means the right to be safe from having your own image taken and used indiscriminately without consent.

•Please observe the legal regulations (data protection, video surveillance) in your country during use.

#### Environment

Add:LEELEN Building.780 Tieshan Rd.,Jimei District,Xiamen IoT Industry Base:1019 Wanjiachun Rd.,Xiang'an District,Xiamen Tel:(0086)592-6157677 Fax:(0086)592-615767

•The product should not be exposed to direct sunlight.

•The product should be kept away from heat sources such as radiators, cookers, etc. It should not be placed in rooms where the temperature is less than 0 °C or greater than 40 °C. Damp basements should also be avoided.

•Do not install the product in locations that are suspect to sudden changes in temperature. Failure to do so may cause condensation to form on the product causing malfunction.

·In areas surrounded by a high electrical field, disturbances may occur in the product's image or sound.

# 1. Product Overview

LCCLEN

V39 indoor station is a 10.1 inch Android digital HD indoor intercom. It can realize audio and video communication with outdoor station, unlock, monitor outdoor station & IPC and other functions. Users can use this device to carry out information exchange, video monitoring, APP remote interaction, etc. Besides, users can more easily grasp the outdoor situation, and remote unlock the outdoor door. The indoor station is mainly used in villa, apartment, office and other scenarios.

Add:LEELEN Building.780 Tieshan Rd.,Jimei District,Xiamen IoT Industry Base:1019 Wanjiachun Rd.,Xiang'an District,Xiamen Tel:(0086)592-6157677 Fax:(0086)592-615767

# 2. Introduction to Menu

LEELEN

**Status:** The upper left corner of the interface displays some working status of device, including Security warning status, WIFI status, LAN status, APP binding status, etc. If the operating status is not normal, the icon is displayed with a Red Cross or an exclamation mark. If it works normally, the Red Cross or exclamation mark disappears.

**APP Binding:tap** to open the QR code, means that APP scans the QR code to bind the device.

**Clean the Screen:**Before cleaning the screen, tap i to lock the screen for 10 seconds to clean the screen without causing faulty operation.

Night Vision Switch: For people with amblyopia, night vision is an option.

**Time View:**You can view the current time on the device. The device can obtain the local time from the network or the management machine even after the power is powered on again.

Records Query: Including Intercom Logs, Alarm Records and Message on the device.

**SOS (Emergency Button):**One-tap call to Service Center (Long press 2s).

**Privacy Setting:** When user wants to be free from indoor station ringtones during a period of time. You can set the Privacy mode on the home page .

**Settings**: Including the information of equipment and user settings. Entering user settings (default password: 123456), users can set date time, alarm setting, sound, display, WiFi, language, call transfer, unlock code, user password, binding information, restart.

**Video Intercom:**Outdoor station and indoor station or indoor station and indoor station between the realization of visual intercom.

Video Survey: Monitor the outdoor station and IPC .

Security Management: A variety of working modes: Away mode, home mode, disarmed.

## **3. Access the Device**

## 3.1 WIFI Setting

If the network is not connected, you can set the LAN or WIFI as required. Usually, the LAN is configured by engineers. For details about how to configure the LAN, Please look at the configuration manual.

We suggest that users preferentially choose WIFI in the environment to realize informatio n interaction between indoor monitor and external network. The configuration process of WIFI is shared as follows:

On the home screen, tap **Settings**->**User Settings** (default password:123456)->WIFI;Turn on the WIFI and select the WIFI available in the current environment. After taping the available WIFI

and enter the WIFI password , tap

the word "connected" below it. Click again, you can see the "Wi-Fi Connection Information" including status information, connection speed, IP address.

#### Note:

LEELEN

1. Ensure that the number of buildings in the cell is less than or equal to 6, and that the first four digits of the outdoor station number are 0001 to 0006.

#### 3.2.3 Receive Call

When a outdoor station or a indoor monitor makes a call to the indoor monitor, the device automatically enters the visual ringing state. Tap to enter the ringing. Tap

#### 3.2.4 Call Records

You can query intercom records in either of the following ways. One way, you can tap Intercom Logs in the main interface to enter the Intercom record query. The second way is to tap Video

to enter the Intercom record query. In the record list, device Intercom, and then tap number, intercom time, call status, call duration, unlock or not, and capture and message information are displayed. You can enter the details page and tap

record, or tap on the bottom button to play messages. If you record multiple pages, you can use slide to turn pages.

#### Note:

1. A total of 100 intercom records can be stored. Capture pictures up to 50. One intercom can capture up to 5 and messages up to 10.

2. A red dot before an intercom record indicates that the intercom record is a missed call. The red arrow indicates that the call is hung up, and the blue arrow indicates that the call enters the intercom phase. The arrow pointing down indicates the received ring, and the arrow pointing up indicates the sent ring.

#### 3.2.5 Blocklist

If a user does not want to receive an intercom or message from a certain number, the user can take the number into blocklist. There are three ways to add blocklist. The first is to tap **Intercom** 

Logs, and select the record in the list on the left, then click 🤷. Alternatively, you can tap

# 3.5 Arm/Disarm

## 3.5.1 Set Arm Mode

Tap "Security Management", the Users can turn on the alarm according to the layout of the defense area sensor at home. There are three states that can be set, including away mode (1), home mode (2) and disarmed (2). Tape very icon to choose the mode. When you choose (2), you can enter the user password: 123456 (Default), to authenticate. Click (2),

there are detailed information, including defense zone number, name, detector type, status and alarm type.

### 3.5.2 Alarm process

When someone triggers the sensor of the defense area at home, the alarm bell will be issued and the alarm pop-up window will be displayed on the interface. At this time, the user can immediately take corresponding safety precautions and eliminate the alarm on the indoor station. When the user tap Disarm, the user password needs to be entered for verification to prevent fire protection that is not carried out by the owner. At this time, if multiple sensors are triggered at the same time, it will be displayed on the interface at the same time, warning up to 8 sensors at the same time, you can turn the page to query the alarm information on the interface, at this time, if you tap Disarm,All alarm pop-ups will be closed at the same time.

## 3.7 Other Common parameters

#### 3.7.1 Date & Time settings

You can tap the **Settings**-> **User Settings** -> **Date Time**, select Date Time from the upper menu, and set the corresponding time parameters.

You can customize the time displayed on the home page or screen saver. You can set the date, time, use 24-hour format or not, choose date format, set NTP (Net Time Protocol) server domain

name, and time zone of the region. After setting these parameters, tap 🔀 to save them.

If time cannot be synchronized after a power failure, you can set a local NTP address. After a power failure and a restart, the device automatically obtains the local time from the

network. For example, the NTP address of Australia is ntp.cs.mu.oz.au. After setting the NTP address, users can check "Automatically determined date and time, time to use the ntp net time" to obtain the time from the network immediately. Otherwise, the indoor station automatically obtains the time from the network within 10 minutes. If the indoor station obtains the time successfully, it automatically obtains the time from the network in 8 hours.

If there is a guard station in the system, and the number of the guard station is set on the indoor station, but the NTP address is not set, you can click "Automatically determined date and time, synchronize the time of the guard station". By this way, the time of the indoor station is synchronized with that of the guard station. If the NTP address is set, the indoor station gain preferentially synchronizes time with the network.

## 3.7.7 Password settings

The password has two kinds of password, one is about Unlock Password Settings, another is the User Password Settings (Default 123456).

#### A. Unlock password

LEELEN

The user tap Setting ->User Settings->Unlock Code. On the screen, you can set a lock password

with a number of 6. Enter your password and tap  $\checkmark$ . Please note that when you are held

hostage by a suspicious person in front of the outdoor station outside the gate, you can enter 9 first and then enter the unlock code. At this time, the property center platform will issue the alarm bell and prompt for hijacking, and you can even notify the property security personnel to request rescue.

#### **B.** User password

When the user wants to enter the user setting interface for the corresponding parameter setting, or to alarm need to use the user password. In this case, the user tap **Settings->User Settings-> User Password** to enter the screen, and tap **User Password**. After entering the screen, the user can set the number 6 as user password for indoor station. Enter your password and tap

Please note that when you are held hostage by a suspicious person in front of the indoor

station outside the gate, you can enter 9 first and then enter the unlock code. , and then the property center platform will issue a kidnapping alarm bell and prompt, you can even notify the property security personnel to request rescue.

#### 4.3.2.2 Remove account

LEELEN

When the account is the main account, if the account is removed, all accounts will be r emoved from this home. Therefore, if you want to make sure that everyone exits the h ome, you can directly remove the main account and all sub-accounts. If you only want t o remove a single account, you can first set the sub-account as the main account in the

APP of sub-account, then enter the current account page, and tap **remove** to remove t he account.

Differences between main account and sub-account:

1. The sub-account can be removed from the home; The main account can remove not only itself, but also sub-account;

2. Main account Can add or remove sub-accounts of the same home;

3.Under the same home of multiple indoor stations, must only choose one of the indoo r station binding APP.

#### 4.3.3 Name setting

User tap **More**->**Name setting**, to modify the home name and device name under the current home. The family name contains a maximum of 25 characters. The device name contains a maximum of 50 characters.

### 4.3.4 Cancel account

LEELEN

User tap **More**->**Cancel account**->**Agree to the statement**->**OK**, to cancel account. When a user logs out of an account, the protection period of the account is 7 days. If the user does not use the account within 7 days, the account is permanently logged out. If the user needs to use the account, the user can register again. However, if the user uses the account again within the seven-day protection period, they can use the account forever.

# 4.4 APP function

#### 4.4.1 Monitoring

User tap **My device**-> <sup>@ Security Camera</sup>, The monitoring page is displayed, you can unlock, hang up the

monitor, capture a picture, transfer the monitor to an intercom, or switch devices.

#### A. Unlock

LCCLEN

User tap **unlocking** to open the door, and then the outdoor station and APP will remind "the door is open"or" Unlock successfully".

#### **B.Capture**

If a user sees a suspicious person from the outdoor station or IPC during monitoring, you can tap **Capture** to take a screenshot and save records in mobile phone.

#### **C.Intercom**

When the user is monitoring, if the visitor in front of the outdoor station just arrives, you can tap **Intercom** to initiate Intercom to the outdoor station.

#### 4.4.1.3 Switch device

If you want to monitor other outdoor station or IPC , you can tap in the upper right corner of the interface ,to switch the device.

LEELEN

Copyright © 2023 Xiamen Leelen Technology Co., Ltd. All Rights Reserved

Note:The indoor station in a home can monitor up to four devices(Monitor all outdoor station first).

### 4.4.2 Intercom

When a visitor calls the indoor station, the APP bound to the corresponding home will also receive the ringing push. Tap the ringing push or tap the APP to enter the call ringing interface. Tap **Answer** to enter the intercom state. Tap Hang up to **Hang up** the ring or call. During a ringing or call, you can tap **Unlocking** to unlock the phone.

# 4.4.3 Records query

#### 4.4.3.1 Intercom records

User can tap **Intercom Record**, to query the intercom records in this home, included incoming number, outgoing number, intercom time.

#### 4.4.3.2 Alarm records

User can tap **Alarm Record** to query the alarm records, included alarm time, alarm address, alarm inductor type.

#### 4.4.4 Other function

#### 4.4.4.1 Change ringtone

User can tap **More**->Ringtone Settings,to choose your ringtone,included Ring1-Ring7.
