Technical Data Sheet

LongGreen 7203

Lubrication fluid used during radial tire uniformity and dynamic balance check

Product description: Semi-transparent, sticky liquid

Use and operation:

In the process of detecting the uniformity and dynamic balance of the radial tire, LongGreen7203 can be evenly coated on the suborifice surface of the tire to form a uniform film on the surface of the tire suborifice, so as to ensure that the detection of uniformity and dynamic balance can be accurate and fast. This product is an environmentally friendly water-based product, with good water solubility. In the actual operation process, in ensuring the existing pressure, detection conditions can be diluted with 1-2 times the water LongGreen7203, and sufficient stirring, so that it is completely dissolved in water, forming a stable dispersion.

Used quantity:

It shall be painted evenly according to the actual situation on site, so as to avoid flowing.

Recommended use :

Tire industry, the application of radial tire dynamic balance uniformity testing process.

Typical physical and chemical indexes :

Composition: Water based high stability products

Appearance: Translucent and viscous liquid

density: $\sim 1.0\text{g}/\text{cm}^3$ (20 °C)

PH : -8.5

Solubility: soluble in water

Packaging and storage:

50kg in plastic barrel; 400 kg / pallet

Store in a dry room at 5- 35 °C to avoid freezing. Store in a closed place for 12 months.
