Technical Description

LongGreen 7501

Rubber Hose Release Agent

Product Description: Yellow sticky liquid

Type of action:

LongGreen 7501 is a special release agent for hose, which can make the installation of unvulcanized rubber hoses and the demolding of vulcanized rubber hoses easy. The product is a universal adhesive hose release agent that can be applied to almost all types of nonpolar and moderately polar adhesive materials, even including ECO. The product for CR, EPDM and CM was particularly effective. LongGreen 7501 has good lubrication effect in unvulcanized hose mold installation and sulfide hose mold removal. And it does not contain any organic silicon substances. The residue on the product after vulcanization can be washed away with water.

Operation points:

According to the rubber type and the design of the metal core, LongGreen 7501 can be used directly used, according to the specific process conditions, can use with a certain proportion of water (the highest ratio should not exceed 1:2).

Quantity of uses:

Depending to the actual process condition of each plant

Recommended use:

LongGreen 7501 can be directly brushed on the core type or directly immersed in it. It does not corrode the tube core, But there must be general warning signs for industrial hygiene.

Typical physicochemical properties:

form: A mixture of multifunctional alcohols and surfactants

surface: Yellow liquid

smell: A slight smell

PH value, 10%:6.0-9.0

Dynamic viscosity: ~1950 mPas (20°C)

Solubility: Solute in water

Physiological property: Refer to the relevant safety information

Packaging and storage:

100 kg pack, plastic bucket; 500 kg / tray

50 kg, plastic bucket; 450 kg / tray

Room temperature, dry place in the original package sealed storage for a year.

The information in this document is accurate and reliable. Because the use of the product is not under the supervision of Shenyang LongGreen Science&Technology Co., Ltd., our company does not undertake any recommended projects take any legal responsibility. The data listed here can only be a rough description and is not intended as a product specification. Shenyang LongGreen Science&Technology Co., Ltd. declares that the reliability of the information is related to its purpose, Due to the fact that our products will be used in conjunction with other materials during the application process, we do not provide any guarantees.
