Enterprise Introduction

Strength guarantee

JSlocker, a brand under JS Group, specializes in high-quality steel cabinet furniture solution. Offering a wide range of steel cabinets, JSlocker focuses on delivering durable, secure, and customizable storage options for various industries, including offices, schools, and public spaces. With a commitment to innovation and precision, JSlocker provides practical storage products designed to meet diverse organizational needs.

JS Group was founded in 2003, It has more than 400 professional employees, 150,000 square meters of factory buildings, and 5,000 square meters of exhibition hall. It has exported to 132 countries and has the strongest international sales talents and management team. It has passed ISO9001, ISO14001 , OHSAS18001 and environmental product certification.

JSlocker has complete manufacturing and testing equipment, such as CNC bending machines, laser cutting machines, fully automatic flexible bending machines, automatic laser welding machines and fully automatic phosphating coating lines. All products are made of high-quality cold-rolled steel, finely formed and professionally mechanized to assemble large molds and equipment production lines, and sprayed with environmentally friendly electrostatic powder technology. The entire product processing process has no odor or toxicity, and no harm to the human body and the surrounding environment.

JS Group has a strong professional design and R&D team. The company has advanced equipment, strong technical force, and its products are in line with the international market. The products are favored by users at home and abroad. With a strong focus on innovation and customer satisfaction, JS Group continues to lead the market in providing reliable storage solutions for businesses and institutions worldwide.

Medical Series

Disposal room

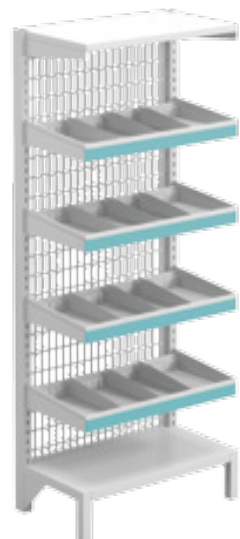

Design Description:

The cabinet body is made of Electrolytic steel plate, and the tabletop is made of medical special composite acrylic. It is easy to clean, dirt resistant, impact resistant, high-temperature resistant, flameretardant, non-toxic and non-toxic, which meets the requirements of high-level environmental sanitation such as hospitals. The hospital should be designed according to the new concept of quiet, convenient and convenient for patients. Excellent team, create excellent products, concise modeling, proportional. It has strict structure and fine workmanship. The multi-level and diversified overall planning, as well as the matching of appropriate colors and practical functions, give people a different feeling from the inside out.

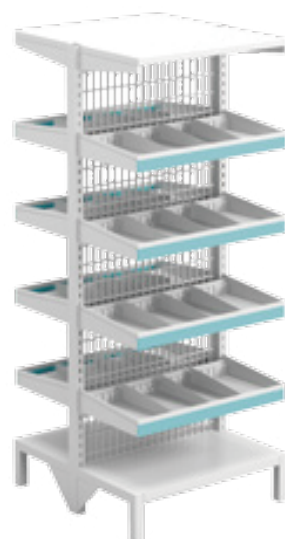

The table top has three materials: artificial stone, stainless steel and physical and chemical board, which can be selected at will according to user requirements.
