

Electromagnetic Desktop 300 Drum Automatic Stir-frying Machine
(Standard Model) SMK-TSGT01

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 430*640*750mm Power: 5kW

Voltage: 220V Phase: Single phase Frequency: 50-60

Pot diameter: 300mm Net weight: 35.8kg Gross weight: 55.2kg

Packaging size: 540*710*860mm

Product Features: 5KW high power, with perfect heat control;

360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency.

Two types of POTS are available:

Pot 1: Three-layer energy-concentrating section layer design, patented product

Pot 2: Iron pot without coating, oxygen process, single-layer;

Electromagnetic Desktop 360 Drum Automatic Stir-frying Machine
(Standard Model) SMK-TSGT01-3.5

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 520*690*770mm Power: 5kW

Voltage: 220V Phase: Single phase Frequency: 50-60

Capacity: 3.5kg Pot diameter: 360mm Net weight: 42.8kg

Gross weight: 64.4kg Packaging size: 600*770*900mm

Product Features: 5KW high power, with perfect heat control;

360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency. Two types of POTS are available: Pot 1:

Three-layer energy-concentrating section layer design, patented product

Pot 2: Single-layer iron pot without coating, oxygen process

Electromagnetic desktop drum automatic stir-frying machine (Round bottom) SMK-TSYGT-A2.5

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 630*500*610mm Power: 5kW

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 2.5kg Pot diameter: 300mm

Product Features:

5KW high power, with perfect heat control;

360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency.

The coated round-bottom pot design is equipped with a high-pressure cleaning spray gun, making pot washing convenient.

Electromagnetic desktop 300 Drum automatic Stir-frying machine
(Sliding control Model) SMK-TSGT-2.5

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 430*640*750mm Power: 5kW

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 2.5kg Pot diameter: 300mm Net weight: 35.8kg

Gross weight: 55.2kg Packaging size: 540*710*860mm

Product Features:

5KW high power, with perfect heat control; 360-degree automatic stir-frying ensures more even cooking. One person can operate three machines simultaneously, saving labor and achieving high efficiency.

Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product Pot 2: Single-layer iron pot without coating, oxygen process

Electromagnetic desktop 360 Drum Automatic Stir-frying Machine
(Sliding control Model) SMK-TSGT-3.5

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 520*690*770mm Power: 5kW

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 3.5kg Pot diameter: 360mm Net weight: 42.8kg

Gross weight: 64.4kg Packaging size: 600*770*900mm

Product Features: 5KW high power, with perfect heat control; 360-degree automatic stir-frying ensures more even cooking. One person can operate three machines simultaneously, saving labor and achieving high efficiency. Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product

Pot 2: Single-layer iron pot without coating, oxygen process

**Electromagnetic desktop 300 drum automatic stir-frying machine
(hand-automatic integrated) SMK-TSGT-2.5S**

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 530*640*750mm Power: 5kW

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 2.5kg Pot diameter: 300mm Net weight: 42kg

Gross weight: 61.6kg Packaging size: 640*710*860mm

Product Features:

5KW high power, with perfect heat control;360-degree automatic stir-frying ensures more even cooking.It can be manually or automatically inverted, making the operation more convenient.One person can operate three machines simultaneously, saving labor and achieving high efficiency.Two types of POTS are available:

Pot 1: Three-layer energy-concentrating section layer design, patented product
Pot 2: Single-layer iron pot without coating, oxygen process

**Electromagnetic desktop 360 Drum Automatic Stir-frying machine
(hand-automatic integrated) SMK-TSGT-3.5S**

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 620*690*770mm Power: 5kW

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 3.5kg Pot diameter: 360mm Net weight: 49.8kg

Gross weight: 73.2kg Packaging size: 700*770*900mm

Product Features: 5KW high power, with perfect heat control; 360-degree automatic stir-frying ensures more even cooking. It can be manually or automatically inverted, making the operation more convenient. One person can operate three machines simultaneously, saving labor and achieving high efficiency. Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product; Pot 2: Iron pot without coating, oxygen process, single-layer;

Electromagnetic desktop intelligent 300 drum stir-frying machine
(round bottom) SMK-TSYGT-B2.5

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

Size: 600*500*585mm Power: 5kW Voltage: 220V

Phase: Single phase Frequency: 50-60 Capacity: 2.5kg

Pot diameter: 300mm

Product Features:

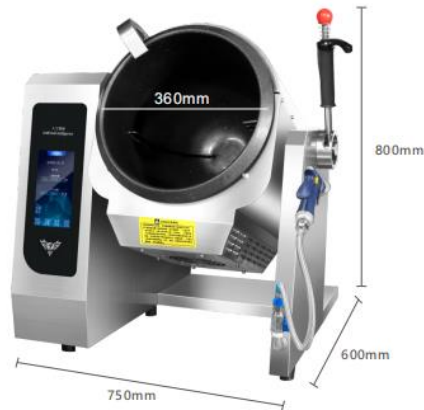

360-degree automatic stir-frying ensures more even cooking.

More than 500 menus are stored and can be freely recorded.

One person can operate three machines simultaneously, saving labor and achieving high efficiency.

Equipped with a high-pressure cleaning spray gun, it comes with a sink for more convenient pot washing.

Electromagnetic desktop intelligent 360 drum stir-frying machine
(round bottom) SMK-TSYGT-B3.5

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 750*600*800mm Power: 8kW

Voltage: 380V Phase: Three-phase Frequency: 50-60

Capacity: 4kg Pot diameter: 360mm

Product Features:

360-degree automatic stir-frying ensures more even cooking.

More than 500 menus are stored and can be freely recorded.

One person can operate three machines simultaneously, saving labor and achieving high efficiency.

Equipped with a high-pressure cleaning spray gun, it comes with a sink for more convenient pot washing.

Electromagnetic desktop Drum Automatic Stir-frying Machine
(Simple Model) SMK-TSGT-D2.5A

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 550*640*750mm Power: 5kW

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 2.5kg Pot diameter: 300mm Net weight: 29kg

Gross weight: 49kg Packaging size: 670*710*740mm

Product Features:

5KW high power, with perfect heat control; 360-degree automatic stir-frying ensures more even cooking. One person can operate three machines simultaneously, saving labor and achieving high efficiency.

Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product Pot 2: Iron pot without coating, oxygen process, single-layer;

Electromagnetic desktop Drum Automatic Stir-frying machine
(Simple Model) SMK-TSGT-D2.5B

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 450*640*750mm Power: 5kW

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 2.5kg Pot diameter: 300mm Net weight: 29kg

Gross weight: 49kg Packaging size: 670*710*740mm

Product Features: 5KW high power, with perfect heat control;

360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency. Two types of POTS are available: Pot 1:

Three-layer energy-concentrating section layer design, patented product

Pot 2: Iron pot without coating, oxygen process, single-layer;

Gas countertop 300 drum automatic stir-frying machine

SMK-TSGT-RQ2.5

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 430*640*750mm Power: 150W

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 2.5kg Pot diameter: 300mm Net weight: 38.6kg

Gross weight: 59.2kg Packaging size: 540*710*900mm

Product Features: Press the key to start ignition, and the sharp sound will prompt. The 12-burner stove has a strong burner head, making cooking over an open flame more flavorful. Four sets of memory timing, calculated in seconds, precise and convenient. 360-degree automatic stir-frying ensures more even cooking. One person can operate three machines simultaneously, saving labor and achieving high efficiency. Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product Pot 2: Single-layer iron pot without coating, oxygen process

Gas desktop 360 drum automatic stir-frying machine

SMK-TSGT-RQ3.5

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

Dimensions: 520*690*850mm Power: 150W

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 3.5kg Pot diameter: 360mm Net weight: 47.2kg

Gross weight: 71.6kg Packaging size: 600*770*980mm

Product Features: One-click ignition and sharp horn prompt;

The 12-burner stove has a strong burner head, making cooking over an open flame more flavorful. Four sets of memory timing, calculated in seconds, precise and convenient. 360-degree automatic stir-frying ensures more even cooking. One person can operate three machines simultaneously, saving labor and achieving high efficiency. Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product

Pot 2: Single-layer iron pot without coating, oxygen process

Gas desktop 300 Drum automatic stir-frying machine (simple)

SMK-TSGT-RQ2.5B

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants,

Dimensions: 465*525*735mm Power: 150W Voltage: 220V

Phase: Single phase Frequency: 50-60Hz Capacity: 2.5kg

Pot diameter: 300mm Gas consumption: 0.95kg of liquefied gas per hour, 1.1 cubic meters of natural gas per hour Net weight: 29.2kg

Gross weight: 49.5kg Outer packaging size: 550*670**860mm

Product Features:One-click ignition and sharp horn prompt;

A strong stove head makes cooking over an open flame more flavorful.

Four sets of memory timing, calculated in seconds, precise and convenient.360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency.Two types of POTS are available:Pot 1:

Three-layer energy-concentrating section layer design, patented product

Pot 2: Single-layer iron pot without coating, oxygen process

Gas desktop 360 Drum Automatic Stir-frying machine (Simple)

SMK-TSGT-RQ3.5B

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 490*535*825mm Power: 150W

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 3.5kg Pot diameter: 360mm

Gas consumption: 1.3kg of liquefied gas per hour, 1.5 cubic meters of natural gas per hour

Product Features: One-click ignition and sharp horn prompt;

A strong stove head makes cooking over an open flame more flavorful.

Four sets of memory timing, calculated in seconds, precise and convenient. 360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency. Two types of POTS are available:

Pot 1: Three-layer energy-concentrating section layer design, patented product

Pot 2: Iron pot without coating, oxygen process, single-layer;

Desktop flame-jet gas drum cooking machine (Simple 300)

SMK-TSGT-RQ2.5H

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 430*606*1037mm Power: 150W

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 2.5kg Pot diameter: 300mm Gas consumption: 0.95kg of liquefied gas per hour, 1.1 cubic meters of natural gas per hour

Product Features:A strong stove head makes cooking over an open flame more flavorful.Flame-fired, Western-style flame-fired dishes; Four sets of memory timing, calculated in seconds, precise and convenient.360-degree automatic stir-frying ensures more even cooking. One person can operate three machines simultaneously, saving labor and achieving high efficiency.

Desktop gas drum cooking machine (Simple 300 without temperature sensing) SMK-TSGT-RQ2.5BG

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 430*618*808mm Power: 150W

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 2.5kg Pot diameter: 300mm

Product Features:A strong stove head makes cooking over an open flame more flavorful.Sealed flame, temperature-free cooking is more comfortable.Four sets of memory timing, calculated in seconds, precise and convenient.360-degree automatic stir-frying ensures more even cooking.One person can operate three machines simultaneously, saving labor and achieving high efficiency

Gas cabinet-type drum cooking machine (300 High Flame model)

SMK-GSGT-RQ2.5M

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 430*900*1320mm Power: 150W

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 2.5kg Pot diameter: 300mm Gas consumption: 2.4kg of liquefied gas per hour, 3 cubic meters of natural gas per hour Outer packaging size: 520*980*1480mm

Product Features:One-click ignition and sharp horn prompt;

A strong stove head makes cooking over an open flame more flavorful.

360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency. Two types of POTS are available:

Pot 1: Three-layer energy-concentrating section layer design, patented product
Pot 2: Single-layer iron pot without coating, oxygen process

Gas cabinet-type drum stir-frying machine (360 Hot Model)

SMK-GSGT-RQ3.5M

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

Dimensions: 490*1000*1450mm Power: 150W Voltage: 220V

Phase: Single phase Frequency: 50-60Hz Capacity: 3.5kg

Pot diameter: 360mm Gas consumption: 2.4kg of liquefied gas per hour, 3 cubic meters of natural gas per hour Outer packaging dimensions: 610*1080*1620mm

Product Features: One-click ignition and sharp horn prompt;

A strong stove head makes cooking over an open flame more flavorful.

360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency. Two types of POTS are available:

Pot 1: Three-layer energy-concentrating section layer design, patented product
Pot 2: Single-layer iron pot without coating, oxygen process

Electromagnetic cabinet type intelligent drum stir-frying machine

(300) SMK-GSGT-ZN2.5

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

Dimensions: 595*900*1355mm Power: 5KW Voltage: 220V

Phase: Single phase Frequency: 50-60Hz Capacity: 2.5kg

Pot diameter: 300mm

Product Features: 5KW high power, with perfect heat control;

360-degree automatic stir-frying ensures more even cooking.

More than 500 menus are stored and can be freely recorded.

One person can operate three machines simultaneously, saving labor and achieving high efficiency. Equipped with a high-pressure cleaning spray gun, it comes with a sink for more convenient pot washing. Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product Pot 2: Iron pot without coating, oxygen process, single-layer;

Gas desktop 260 Drum automatic stir-frying machine (simple)

SMK-TSGT-RQ1.5B

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

Dimensions: 392*410*572mm Power: 150W Voltage: 220V

Phase: Single phase Frequency: 50-60Hz Capacity: 1.5kg

Pot diameter: 200mm

Product Features:One-click ignition and sharp horn prompt;

A strong stove head makes cooking over an open flame more flavorful.

Four sets of memory timing, calculated in seconds, precise and convenient.360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency

Electromagnetic desktop drum stir-frying machine 260

SMK-TSGT-260

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

Dimensions: 450*630*730mm Power: 5W Voltage: 220V

Phase: Single phase Frequency: 50-60Hz Capacity: 2kg

Pot diameter: 260mm

Product Features:

5KW high power, with perfect heat control;

360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency

Gas cabinet type 300 Drum automatic stir-frying machine (simple)

SMK-GSGT-RQ2.5B

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

dimensions: 465*900*1320mm Power: 150W Voltage: 220V

Phase: Single phase Frequency: 50-60Hz Capacity: 2.5kg

Pot diameter: 300mm Gas consumption: 0.95kg of liquefied gas per hour, 1.1 cubic meters of natural gas per hour Net weight: 41kg

Gross weight: 83.5kg Outer packaging size: 520*980*1480mm

Product Features: One-click ignition and sharp horn prompt; A strong stove head makes cooking over an open flame more flavorful. Four sets of memory timing, calculated in seconds, precise and convenient. 360-degree automatic stir-frying ensures more even cooking. One person can operate three machines simultaneously, saving labor and achieving high efficiency. Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product Pot 2: Iron pot without coating, oxygen process, single-layer;

Gas cabinet type 360 Drum Automatic Stir-frying machine (Simple)

SMK-GSGT-RQ3.5B

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

dimensions: 490*1000*1450mm Power: 150W Voltage: 220V

Phase: Single phase Frequency: 50-60Hz Capacity: 3.5kg

Pot diameter: 360mm Gas consumption: 1.3kg of liquefied gas per hour, 1.5 cubic meters of natural gas per hour Net weight: 49.3kg

Gross weight: 89.2kg Outer packaging dimensions: 610*1080*1620mm

Product Features:One-click ignition and sharp horn prompt;A strong stove head makes cooking over an open flame more flavorful. Four sets of memory timing, calculated in seconds, precise and convenient.360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency.Two types of POTS are available:

Pot 1: Three-layer energy-concentrating section layer design, patented product Pot 2: Single-layer iron pot without coating, oxygen process

Electromagnetic cabinet type single-head drum automatic stir-frying machine SMK-GSGT

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

dimensions: 550*900*1200mm Power: 5KW Voltage: 220V

Phase: Single phase Frequency: 50-60Hz Capacity: 2.5kg

Pot diameter: 300mm Net weight: 51.3kg Gross weight: 96.5kg

Outer packaging dimensions: 990*640*1470mm

Product Features: 5KW high power, with perfect heat control;

360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency. Equipped with a high-pressure cleaning spray gun, it comes with a sink for more convenient pot washing.

Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product Pot 2: Single-layer iron pot without coating, oxygen process

Electromagnetic cabinet type single-head drum automatic stir-frying machine SMK-GSGT1-3.5

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

Dimensions: 600*950*1200mm Power: 5KW Voltage: 220V

Phase: Single phase Frequency: 50-60Hz Capacity: 3.5kg

Pot diameter: 360mm

Product Features:

5KW high power, with perfect heat control;

360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency. Equipped with a high-pressure cleaning spray gun, it comes with a sink for more convenient pot washing.

Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product Pot 2: Single-layer iron pot without coating, oxygen process

Gas countertop double-head drum stir-frying machine (simple)

SMK-GSGT-RQ2.5B2

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

dimensions: 1100*950*1200mm Power: 150W*2 Voltage: 220V

Phase: Single phase Frequency: 50-60Hz Capacity: 2.5kg

Pot diameter: 300/360mm Gas consumption: 0.95kg of liquefied gas per hour, 1.1 cubic meters of natural gas per hour

Product Features:

One-click ignition and sharp horn prompt;

A strong stove head makes cooking over an open flame more flavorful.

Four sets of memory timing, calculated in seconds, precise and convenient. 360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency. Two types of POTS are available:

Pot 1: Three-layer energy-concentrating section layer design, patented product
Pot 2: Single-layer iron pot without coating, oxygen process

Electromagnetic cabinet type drum stir-frying combination machine

SMK-GSGT-GC

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

Dimensions: 1100*900*1200mm Power: 5+15KW Voltage: 380V

Phase: Three-phase Frequency: 50-60Hz Pot diameter: 360mm

Product Features:

5KW high power, with perfect heat control;

360-degree automatic stir-frying ensures more even cooking.

The combination of a drum and a stir-fry is multi-functional.

One person can operate three machines simultaneously, saving labor and achieving high efficiency.

Equipped with a high-pressure cleaning spray gun, it comes with a sink for more convenient pot washing.

Electromagnetic cabinet type three-head drum automatic stir-frying machine SMK-GSGT3

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

Dimensions: 1600*900*1200mm Power: 5+5+5 kW

Voltage: 380V Phase: Three-phase Frequency: 50-60Hz

Capacity: 2.5kg Pot diameter: 300/360mm

Product Features:

The stove head is fierce and the heat is intense.

360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency. Equipped with a high-pressure cleaning spray gun, it comes with a sink for more convenient pot washing. Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product Pot 2: Iron pot without coating, oxygen process, single-layer;

Gas cabinet-type three-head drum cooking machine (360 Simple)

SMK-GSGT-RQ3.5B3

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 1800*1000*1450mm Power: 150W*3

Voltage: 220V Phase: Single phase Frequency: 50-60Hz

Capacity: 3.5kg*3 Pot diameter: 360mm

Product Features:

The stove head is fierce and the heat is intense.

360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency. Equipped with a high-pressure cleaning spray gun, it comes with a sink for more convenient pot washing. Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product Pot 2: Single-layer iron pot without coating, oxygen process

**Electromagnetic cabinet type double-head stir-frying machine with
tail SMK-SGT2.5C**

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

External dimensions: 1800*940*1200mm Power: 5+15+5KW

Voltage: 380V Phase: Three-phase Frequency: 50-60Hz

Capacity: 2.5kg Pot diameter: 300/360mm

Product Features:

5KW high power, with perfect heat control;

360-degree automatic stir-frying ensures more even cooking.

One person can operate three machines simultaneously, saving labor and achieving high efficiency. Equipped with a high-pressure cleaning spray gun, it comes with a sink for more convenient pot washing. Two types of POTS are available: Pot 1: Three-layer energy-concentrating section layer design, patented product

Pot 2: Iron pot without coating, oxygen process, single-layer;

**Intelligent electromagnetic desktop drum fully automatic cooking
robot (feeding) SMK-TSYD2.5-TFL**

Product functions: Stir-fried dishes, stir-fried rice, stir-fried noodles

Applicable venues: restaurant chains, Chinese and Western restaurants, snack bars

dimensions: 767*700*1111mm Power: 5kW Voltage: 220V

Phase: Single phase Frequency: 50-60Hz Capacity: 2.5kg

Product Features:

USB recipe upload function 360-degree automatic stir-frying ensures more even cooking. Over 1,000 menus are stored and can be freely recorded. One person can operate three machines simultaneously, saving labor and achieving high efficiency. Automatic vegetable feeding and 3 types of powder and 2 types of liquid, with an accuracy of 0.1mg. The entire cooking process is fully automatic and requires no human assistance. Equipped with a high-pressure cleaning spray gun, it comes with a sink for more convenient pot washing.
