

Bag magazine Max. capacity is up to 900 Woven PP bags. Position sensor get open-mouth position and interlock servo system to adjust position compensation for open mouth bag deviation.

Special microgripper was developed base on bionics principles can separate and open-mouth woven bag. The compressor air, photoelectric sensor provided technical support for automatic operation.

Bag fault shooting device was developed so as to solve the problem bag mouth adhesion and improve the bagging efficiency.

Type	Specification
Typical application	4 & 6 spouts bagging carousel (Buhler, Ameco, etc.)
Bag material	poly-woven bags
Open-mouth capacity	Up to 850 bags/h
Sewing capacity	Up to 950 bags/h
Bag magazine volume	Up to 900 bags
