

AWD-03 Kinematic Viscosity Tester ASTM D445

AWD-03 kinematic viscosity tester is designed and manufactured according to the standards of ASTM D445 and GB/T 265. it can be used to determine the kinematic viscosity of the petroleum products accurately(for Newtonian flow). The unit of the determined kinematic viscosity is mm^2/s .

Technical Parameters

No.	Tech Indicator	Description
1	Power	AC220V \pm 10% 50Hz (Can be changed to your country request)
2	Input Power	< 1850W
3	Main Heating Power	1000W
4	Assistant Heating Power	800W
5	Temperature Control Range	40 ~ 100℃
6	Accuracy	$\pm 0.1^\circ\text{C}$
7	Capillary Type	Pinkevitch Viscometer
8	Test Hole	4 Holes
9	Characteristics	<ul style="list-style-type: none"> ◆Digital Temperature Control ◆Double Bath ◆Easy to Operation ◆Testing Exactly ◆Result Reliable
