Basic Information

- Place of Origin: China, Guangdong
- Brand Name: No Brand

Product Specification

- Material: Aluminum
- Width: Customizable
- Installation Type: Surface Mount
- Heat Dissipation: Efficient
- Shape: Customizable
- Thickness: Customizable
- Surface Treatment: Anodized, Coating
- Length: Customizable
- Highlight: Kitchen aluminium led mounting profile, aluminium led mounting profile Channel Diffuser, led corner channel diffuser

Product Description

Product Description:

One of the key features of this product is its customizable shape and length. Whether you need a straight profile or something more intricate, we can create a profile that fits your specific requirements. This makes it an ideal choice for a range of applications, from LED wall washer lighting to other architectural and decorative lighting projects.

The use of aluminum as the primary material for this LED profile ensures efficient heat dissipation. This means that your LEDs will be kept at a safe operating temperature, which can help to extend their lifespan. Additionally, the efficient heat dissipation helps to prevent any potential damage to the surrounding materials, making this profile a safe and reliable choice for all your lighting needs.

The LED Aluminum Profile is a high-quality and durable solution that is perfect for a wide range of lighting applications. Whether you need a custom profile for LED wall washer lighting or any other lighting project, this profile is sure to meet your needs. So why wait? Order your LED Aluminum Profile today and take the first step towards achieving your lighting goals.

Features:

Product Name: LED Aluminum Profile

Durability: High

Surface Treatment: Anodized, Coating

Length: Customizable

Material: Aluminum

Heat Dissipation: Efficient

Compatible with: led wall washer, strip light

Technical Parameters:

Shape:	Customizable
Corrosion Resistance:	Yes
Surface Treatment:	Anodized, Coating
Installation Type:	Surface Mount
Heat Dissipation:	Efficient
Application:	Lighting Industry
Length:	Customizable
Thickness:	Customizable
Color:	Customized
Material:	Aluminum

Applications:

One common use for LED Aluminum Profiles is in cabinets and shelves. The strips of LED lights can be mounted within the profile to provide subtle, yet effective lighting. This is especially useful in kitchen cabinets, where the addition of LED lighting can make it easier to see inside dark cabinets and find items quickly. Additionally, the aluminum material of the profile ensures that the lighting is evenly distributed and doesn't create any hot spots.

Another popular use for LED Aluminum Profiles is in display cases. The profiles can be mounted along the edges of the case to provide a professional and stylish look. The customizable width and length also make it easy to fit the profiles to the size of the case. The anodized or coated surface treatment options allow the profiles to match the look and feel of the display case, providing a seamless and cohesive appearance.

LED Aluminum Profiles are also a great option for under-cabinet lighting. The profiles can be mounted directly under the cabinets to provide a soft, yet effective lighting solution. This is especially useful in kitchens, where the addition of LED lighting can make it easier to prepare food and see what you're doing. The aluminum material of the profile ensures that the lighting is evenly distributed and doesn't create any hot spots.

Finally, LED Aluminum Profiles are often used in commercial settings, such as in retail stores or hotels. The profiles can be mounted along the walls or ceilings to create a stylish and modern look. The customizable width and length make it easy to fit the profiles to the size of the space. The anodized or coated surface treatment options allow the profiles to match the look and feel of the space, providing a seamless and cohesive appearance.

Overall, LED Aluminum Profiles are a versatile and durable solution for a wide range of lighting applications. Whether you're looking to add lighting to your kitchen cabinets, display cases, or commercial space, LED Aluminum Profiles are a great option. With their customizable width and length, anodized or coated surface treatment options, and high durability, they're sure to meet all of your lighting needs.

Customization:

Packing and Shipping:

Product Packaging:

The LED Aluminum Profile product will be securely packed in a cardboard box with bubble wrap to prevent damage during shipping.

Shipping:

We offer free standard shipping for the LED Aluminum Profile product within the United States. The estimated delivery time is 3-5 business days. For international orders, shipping rates and delivery times may vary depending on the destination country. Customers will be provided with a tracking number to monitor the status of their shipment.
