Custom led strip light aluminium profile

Product Description

Product Description:

Our LED Aluminum Profile is customizable in terms of shape and thickness, allowing you to create a unique design that perfectly fits your project requirements. The profile's surface mount installation type makes it easy to install, even in tight spaces.

The LED Aluminum Profile can be customized in different colors, enabling you to match your lighting design with your project's overall look and feel. It is perfect for use in commercial and residential spaces, such as offices, homes, and retail stores.

Our LED Aluminum Profile is designed to be used with strip light, providing a sleek and modern look to your lighting design. The profile's aluminum construction also helps to dissipate heat, preventing any damage to your strip light and prolonging its lifespan.

With our LED Aluminum Profile, you can create a clean and professional-looking lighting installation that is sure to impress. Whether you're an architect, interior designer, or DIY enthusiast, our product is a must-have for your next project.

Features:

Product Name: LED Aluminum Profile

Corrosion Resistance: Yes

Installation Type: Surface Mount

Heat Dissipation: Efficient

Shape: Customizable

Durability: High

Compatible with LED strip lights and wall washer lights

Technical Parameters:

Technical Parameter	Description
Width	Customizable
Heat Dissipation	Efficient
Material	Aluminum
Durability	High
Shape	Customizable
Length	Customizable
Corrosion Resistance	Yes
Thickness	Customizable
Surface Treatment	Anodized, Coating
Application	Lighting Industry, led wall washer, education led light, strip light

Applications:

One of the primary applications of LED Aluminum Profile is for education LED lights. LED Aluminum Profile can be used in classrooms, libraries, and other educational facilities to provide adequate lighting for students. The product's efficient heat dissipation ensures that the light stays on for an extended period without overheating. The customizable width and length of LED Aluminum Profile allow it to fit any space, making it an ideal product for educational institutions.

Another application of LED Aluminum Profile is for LED wall washers. LED wall washers are used to enhance the aesthetics of a building's exterior or interior. LED Aluminum Profile can be used to make LED wall washers that are long-lasting and efficient in heat dissipation. The product's customizable length and width make it easy to create LED wall washers of any size, making it a perfect option for architects and designers.

LED Aluminum Profile can also be used for retail displays. The product's surface mount installation type makes it easy to attach it to a wall, making it ideal for displaying products in retail stores. The customizable width and length of LED Aluminum Profile make it easy to fit any space, making it an excellent choice for retail displays of any size.

In conclusion, LED Aluminum Profile is a versatile product that can be used in various applications and scenarios. Its customizable width and length make it ideal for education LED lights, LED wall washers, and retail displays. The product's efficient heat dissipation and high-quality aluminum material make it an excellent choice for anyone looking for a durable and long-lasting lighting solution.

Customization:
