Basic Information

- Place of Origin: China,Guangdong
- Brand Name: No Brand
- Delivery Time: 15-20 Workdays

Product Specification

- Material: Aluminum
- Waterproof: Yes
- Installation: Easy
- Maintenance: Low
- Compatibility: Universal
- Color: Customized
- Durability: High
- Size: Customizable
- Highlight: **Ip68 Waterproof aluminium housing, aluminium housing Extrusion, Ip68 aluminum extrusion enclosure**

Product Description

Product Description:

The Aluminum Enclosure is built with high-quality materials and is designed to last a lifetime. The square shape of the enclosure provides a sleek and modern look, while the anodized finish ensures durability and protection from wear and tear. One of the best things about our Aluminum Enclosure is that it is fully customizable in size, allowing you to choose the perfect fit for your specific needs. Whether you need a small enclosure for personal use or a larger one for commercial purposes, we've got you covered. Our Aluminum Enclosure is also compatible with a wide range of power stations, making it a universal solution for all your power needs. You won't have to worry about compatibility issues - simply choose the size that works best for you and you're good to go. Finally, we understand that appearance is important to many of our customers, which is why we offer custom color options for our Aluminum Enclosures. Choose the color that best fits your personal style or corporate branding - the possibilities are endless! Choose our Aluminum Enclosure for a reliable, durable, and customizable solution to your power station needs. Order now and experience the ultimate in quality and performance!

Features:

Product Name: Aluminum Enclosure
Material: Aluminum
Size: Customizable (Square)
Heat Resistance: Good
Compatibility: Universal
Color: Customized (Anodized)

Technical Parameters:

Parameter	Value
Installation	Easy
Design	Sleek
Shockproof	Yes
Heat Resistance	Good
Durability	High
Type	Power Station
Size	Customizable
Corrosion Resistance	Excellent
Color	Customized
Compatibility	Universal
Material	Anodized Aluminum
Shape	Square
Finish	Square

Applications:

One of the main applications of the aluminum enclosure is in the power station industry. This product is perfect for housing electrical equipment, such as batteries, inverters, and solar panels. The aluminum enclosure is customizable in size, making it suitable for different types and sizes of power station equipment. The shockproof feature of this product ensures that the equipment is protected from impacts and vibrations during transportation and usage.

The aluminum enclosure is also compatible with a wide range of electrical equipment, making it a universal product. This means that it can be used in different industries, such as telecommunications, automotive, and medical equipment. The low maintenance feature of this product makes it ideal for long-term use, reducing the need for frequent repairs and replacements.

The aluminum enclosure is made in Guangdong, China, and has a delivery time of 15-20 workdays. This product is not branded, which means that it can be used for OEM and ODM purposes. The anodized finish of the aluminum enclosure gives it a sleek and professional appearance, making it suitable for both indoor and outdoor use.

In summary, the aluminum enclosure is a high-quality, customizable, and versatile product that can be used in various applications. Its shockproof feature, compatibility, and low maintenance make it an ideal choice for different industries. Whether you need to house electrical equipment, protect sensitive components, or simply enhance the appearance of your product, the aluminum enclosure is the perfect solution.

Customization:

Our Aluminum Enclosure product comes with a range of customization options to suit your needs. As a No Brand product, it is proudly made in Guangdong, China and has a delivery time of 15-20 workdays. The enclosure boasts excellent corrosion resistance and high durability, ensuring that your product is protected for the long-term. It is specifically designed for Power Stations and is compatible with a range of devices thanks to its universal compatibility. The enclosure is made from anodized aluminum and is square in shape, making it a sleek and modern option for your product. Additionally, the size of the enclosure is customizable to fit your specific requirements.

Packing and Shipping:

Product Packaging:

The Aluminum Enclosure product will be carefully packed in a sturdy box with protective foam padding to ensure safe delivery and prevent any damage during transport.

Shipping:

Our standard shipping method is via ground shipping within the United States. For international orders, we offer both air and sea freight options. Shipping costs will vary depending on the destination and shipping method selected.
