

Silver Square Aluminium Electrical Enclosure Extruded Lightweight

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: China,Guangdong
- Brand Name: No Brand
- Delivery Time: 15-20 Workdays

Product Specification

- Material: Aluminum
- Design: Sleek
- Shockproof: Yes
- Color: Silver
- Waterproof: Yes
- Durability: High
- Installation: Easy
- Compatibility: Universal
- Highlight: Square aluminium electrical enclosure,
Extruded aluminium electrical enclosure,
Square extruded aluminium enclosure

Product Description

Product Description:

The Aluminum Enclosure is an ideal product for those who require a protective case for their devices or battery packs. The enclosure is designed to provide maximum protection for the battery and other sensitive electronic components. The aluminum body provides excellent heat dissipation, ensuring that the battery stays cool, which is essential for its longevity.

This product is customizable in size, allowing it to accommodate various battery sizes and configurations. The Aluminum Enclosure is suitable for use in various applications, including marine, automotive, aerospace, and industrial applications. Its sleek design makes it an attractive choice for those who require a protective case that doesn't compromise on aesthetics.

The Aluminum Enclosure is also waterproof, which means it can protect the battery and other electronic components from water damage. This feature makes it an ideal product for use in marine applications or other environments where water exposure is a concern.

In summary, the Aluminum Enclosure is a sleek, lightweight, and customizable product that provides excellent corrosion resistance. It is designed to protect batteries and other sensitive electronic components from damage, and its waterproof feature makes it suitable for use in various applications. Its high-quality aluminum body ensures its durability and reliability, making it an ideal choice for those who require a protective case for their devices or batteries.

Features:

Product Name: Aluminum Enclosure

Durability: High

Waterproof: Yes

Compatibility: Universal

Material: Aluminum

Shockproof: Yes

Features an anodized aluminum finish for added durability

Designed to protect batteries and other sensitive electronics

Technical Parameters:

Design	Sleek
Waterproof	Yes
Durability	High
Shockproof	Yes
Heat Resistance	Good
Type	Battery Box
Size	Customizable
Compatibility	Universal
Weight	Lightweight
Corrosion Resistance	Excellent

Applications:

For instance, Aluminum Enclosures are perfect for use in the electronics industry, where they are used to house sensitive electronic components and devices. They can be used in various electronic devices such as amplifiers, audio equipment, power supplies, and audio mixers. The sleek design and silver color of these enclosures make them a great choice for audio and video equipment manufacturers looking for a cutting-edge design that complements their products' aesthetics.

In the automotive industry, Aluminum Enclosures are used to house electronic components in cars, trucks, and other vehicles. These enclosures provide excellent protection against harsh weather conditions and vibrations, ensuring that electronic components remain safe and operational. They are also ideal for use in outdoor applications such as solar power systems, outdoor lighting, and communication systems.

Aluminum Enclosures are also popular in the medical sector, where they are used to house medical equipment and devices. The enclosures' excellent heat resistance and lightweight make them perfect for use in medical devices such as monitors, ventilators, and infusion pumps. The enclosures' sleek design and silver color also make them ideal for use in medical devices that require a modern and stylish look.

Other applications of Aluminum Enclosures include use in the telecommunications industry, where they are used to house communication equipment and devices such as routers and switches. They are also ideal for use in the aerospace industry, where they are used to house various electronic components in airplanes and spacecraft.

Aluminum Enclosures are easy to install, making them ideal for use in various product application scenarios. They are also lightweight, making them easy to transport and handle. The enclosures are made in China, Guangdong, and have a delivery time of 15-20 workdays, ensuring that customers receive their orders in good time.

Customization:

Customize your Aluminum Enclosure to meet your exact specifications with our Product Customization Services. Our Aluminum Enclosure, with no brand name, is made in Guangdong, China and has a delivery time of 15-20 workdays. The sleek design and lightweight of the square-shaped product make it perfect for housing batteries and other electronic components. The size of the Aluminum Enclosure is customizable to fit your unique needs, and installation is easy. Enjoy the excellent corrosion resistance of our high-quality product.

Packing and Shipping:

Product Packaging:

The aluminum enclosure will be packed in a sturdy cardboard box to ensure its safety during transportation.

The box will be sealed with adhesive tape to prevent the enclosure from falling out.

The enclosure will be wrapped in bubble wrap to protect it from scratches and other damages.

Inside the box, there will be foam inserts to keep the enclosure in place and prevent any movement.

Shipping:

The aluminum enclosure will be shipped via a reliable courier service that offers tracking information.

The shipping cost will be calculated based on the weight and destination of the package.

The package will be shipped within 2-3 business days after the order has been confirmed.

Delivery times will vary depending on the destination and courier service used.

Customers will be provided with a tracking number so they can track the status of their shipment.
