

Universal Powerstation Extruded Aluminum Enclosure Aluminium Housing Customized

Our Product Introduction

for more products please visit us on alu-heatsink.com

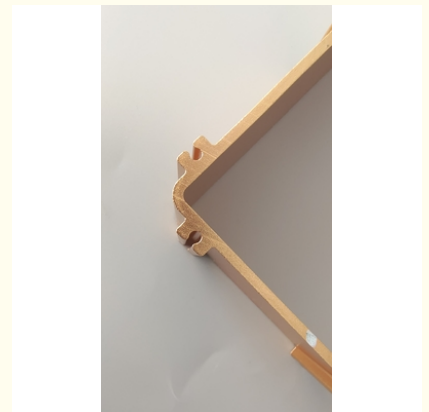

Basic Information

- Place of Origin: China,Guangdong
- Brand Name: No Brand
- Delivery Time: 15-20 Workdays

Product Specification

- Waterproof: Yes
- Compatibility: Universal
- Maintenance: Low
- Type: Power Station
- Color: Customized
- Durability: High
- Design: Sleek
- Size: Customizable
- Highlight: **Universal extruded aluminum enclosure, extruded aluminum enclosure Housing, Powerstation aluminium housing**

Product Description

Product Description:

The Aluminum Enclosure is specifically designed to ensure that your batteries are well-protected. The aluminum material used in this product makes it highly resistant to corrosion, which means that you can store your batteries in it without worrying about any damage due to corrosion. This feature ensures that the enclosure remains in excellent condition for years to come.

The Aluminum Enclosure is the perfect choice for those looking for a reliable and durable product that can withstand harsh environmental conditions. The high durability of this enclosure is due to the use of aluminum material, which is known for its strength and resilience. This product is designed to last, ensuring that you get the best value for your money.

One of the most significant benefits of using the Aluminum Enclosure is its excellent heat resistance. The aluminum material used in this product ensures that it can withstand high temperatures, making it perfect for power stations. This feature makes it an ideal choice for those who need to store batteries in areas that are exposed to high temperatures.

Overall, the Aluminum Enclosure is an excellent choice for those looking for a reliable and durable product. With its anodized aluminum material, it offers high corrosion resistance, making it perfect for storing batteries. Its high durability makes it an ideal choice for harsh environments, and its excellent heat resistance ensures that it can withstand high temperatures.

Features:

Product Name: Aluminum Enclosure

Type: Power Station

Design: Sleek

Shockproof: Yes

Size: Customizable (Square)

Waterproof: Yes

Battery: Not specified

Anodized: Not specified

Technical Parameters:

Durability	High
Size	Customizable
Heat Resistance	Good
Compatibility	Universal
Color	Customized
Installation	Easy
Corrosion Resistance	Excellent
Material	Aluminum
Shockproof	Yes
Type	Power Station

Applications:

The Aluminum Enclosure is a versatile product that can be used in a variety of applications. It is particularly suited for use in the power station industry due to its high durability and excellent corrosion resistance. The product is made from high-quality aluminum, which is known for its strength and durability. It is heat-resistant and has a good ability to resist corrosion, making it ideal for use in demanding environments.

One of the key applications for the Aluminum Enclosure is in the battery industry. The product is perfect for use as a battery housing due to its excellent heat resistance and corrosion resistance. The aluminum material ensures that the battery is protected from external factors that can damage it, such as moisture, dust, and dirt. The enclosure can also help to extend the life of the battery by protecting it from extreme temperatures.

Another application for the Aluminum Enclosure is in the power station industry. The product is ideal for use in this industry due to its high durability and ability to withstand harsh environments. The enclosure can be used to house a range of equipment, including transformers, switchgear, and control panels. It is also suitable for use in outdoor applications, as it is weather-resistant and can withstand exposure to the elements.

The Aluminum Enclosure is also suitable for use in the electronics industry. It can be used to house a range of electronic equipment, including sensors, circuit boards, and control systems. The enclosure provides excellent protection against external factors that can damage electronic equipment, including moisture, dust, and dirt.

The Aluminum Enclosure is a high-quality product that is manufactured in China, Guangdong. Delivery time for this product is 15-20 workdays. It is a type of power station that is designed to provide excellent protection for batteries and other equipment. The product is highly durable and made from high-quality aluminum, which ensures that it is able to withstand harsh environments. Overall, the Aluminum Enclosure is a versatile product that can be used in a range of applications across different industries.

Customization:

Customize your Aluminum Enclosure from No Brand, made in Guangdong, China, with a delivery time of 15-20 workdays. Choose your own color to fit your branding needs and enjoy low maintenance with shockproof and waterproof capabilities. The universal compatibility of this enclosure makes it perfect for any project. Made with high-quality anodized aluminum for durability and a sleek finish. Upgrade your project with a custom battery compartment, ensuring easy access and functionality.

Packing and Shipping:

Product Packaging:

Aluminum enclosure

Mounting screws

User manual

Shipping:

Ships within 2-3 business days

Free standard shipping within the US

International shipping available with additional cost
