LC-308 INTELLIGENT LAUNDRY CLOSET

FUNCTIONS

1. Wash, Dry and Care All-in-One

Provides dedicated modes for ordinary clothes, coats, wool, and silk. Spray-washes clothes while they are statically hanging. It adds and dilutes specialized laundry detergent, and rinses automatically. There's no scrubbing during the washing procedure. Drying and sterilizing come right after washing, leaving clothes smooth, wrinkle-free, and with a fresh fragrance.

2. Smart Drying

Equipped with a temperature and humidity sensor, its smart mode automatically identifies the humidity of clothes and stops drying when they are completely dry. It also supports a timer mode, allowing manual setting of drying time.

3. Photonic Negative Ion Sterilization

Equipped with a photonic negative ion sterilization generator that releases natural-like ultraviolet light and high-concentration negative ions for sterilization throughout the washing and drying process.

PARAMETERS

- *Product Dimensions: H 190cm × W 60cm × D 62cm*
- *Packaging Dimensions: H 200cm × W 65cm × D 70cm*
- *Internal Dimensions: H 145cm × W 56cm × D 50cm*
- *Net Weight: 65kg*
- *Gross Weight: 75kg*
- *Voltage: 220V*
- *Power: 1600W*

4. Scheduled Laundry

Time can be set in advance, and the system automatically completes the washing, drying, and caring process at the designated time.

5. Preheating for Wearing Clothes

The daily dressing time can be preset. Winter clothes can be heated in advance and worn immediately after taking them out with warmth and comfort.

6. Scent and Odor Removal

It has built-in aromatherapy box with customizable scents, which help remove odors and leave clothes a fresh smell.

MATERIAL & WARRANTY

- *Cabinet Material: High-polymer board core with composite spray-coated aluminum sheet finish. It is environmentally friendly, insulating, heat-insulating, corrosion-resistant, waterproof, sun-proof, and durable.*
- *Warranty Policy: 3-year warranty and long-term maintenance.*
