Company Profile

公司概况 Company Profile

Qingzhou Yongli Mining And Dredging Machinery Co., Ltd. is located in Qingzhou City, Shandong Province, one of the ancient nine states. We are a professional manufacturer and supplier of dredging vessels and mining equipment that integrates scientific research, development, design, production, installation and commissioning, and personnel allocation services.

Products

Product introduction

产品介绍

01.

Dredging vessels

include: cutter suction dredger, bucket wheel dredger, jet suction dredger, siphon sand dredger, drilling suction sand dredger, chain bucket sand dredger, amphibious dredger, backhoe dredger, multifunctional work boats, self-suction and self-unloading barges, transport barges, etc.

02.

Fishing ships

include: fishing vessels, breeding vessels, bait vessels, aquatic transport and marketing vessels, refrigerated processing vessels and supply vessels

03.

Mining equipment

includes: floating production platform, bucket chain gold/diamond dredger, jet suction gold/diamond dredger, cutter suction gold/diamond dredger, land-use gold/diamond washing plant, as well as an integrated production line for mining and mineral processing in water and on land.

A large red and white striped crane is mounted on a barge in the ocean. The crane's arm is extended, and its bucket is suspended in the air. The barge is white with red accents and has several tall red structures on it. The sky is blue with light clouds, and the water is a deep blue.

Thanks
