

## Brick Machine Pallets To Improve The Service Life Of The Notes

1. Regular cleaning, long time use of brick machine pallet, the surface will remain a lot of substances and chemicals, so regular cleaning (non-contact spraying or contact brushing), high temperature sun drying can be.
2. Brick machine pallet should not be thrown around in the process of use, to avoid unnecessary wear and tear.
3. The humidity of concrete blocks also has an effect on the service life of the pallet, so adjust the humidity of the bricks (humidity affects the weight of the bricks).
4. Maintenance (Keep it as dry as possible)
5. Can not be overweight, prolonged overweight use of pallets will affect the curvature and service life.
