

PWM 12vdc 2A max Dial Dimmer

Part number LW-DIM122A

Input voltage: DC 12V

Output voltage: DC 12v

Output power: 2A (Maximum 24W)

Output Signal PWM

Simply turn dial to increase or decrease brightness and turn off and on

No battery required

A constant voltage power supply will be needed to provide the 12vdc input. The output voltage supplied by this unit will be the same as the input voltage so make sure the correct PSU is selected for your LED strip
