

## ABOUT US

LEDWIDE Lighting, established in 2010, specializes in designs, develops and manufactures custom-made LED lighting solutions for architectural, residential and commercial industries. From concept or enquiry to development and production of all the elements. Our products are based on proprietary aluminum extrusions for strength and cool operation. Our light engines are assembled to customer specifications addressing brightness, color temperature, and efficiency.

We collaborate with lighting wholesalers, lighting designers, and architects to provide users with optimal solutions for their applications in over 40 countries.

### Main Products

LED Curved Profiles  
LED Linear Profiles  
Customized Profiles, Diffusers & Accessories

### Value Added Services

3D Drawings and Rendering  
Shop Drawing  
Prototyping  
Laser Cutting  
Fabrication  
Assembling  
Testing

### The Graphics Department

Our graphics design department is responsible for product photography, exhibitions, product specs and installation guides and the company website.

### The Technical Department

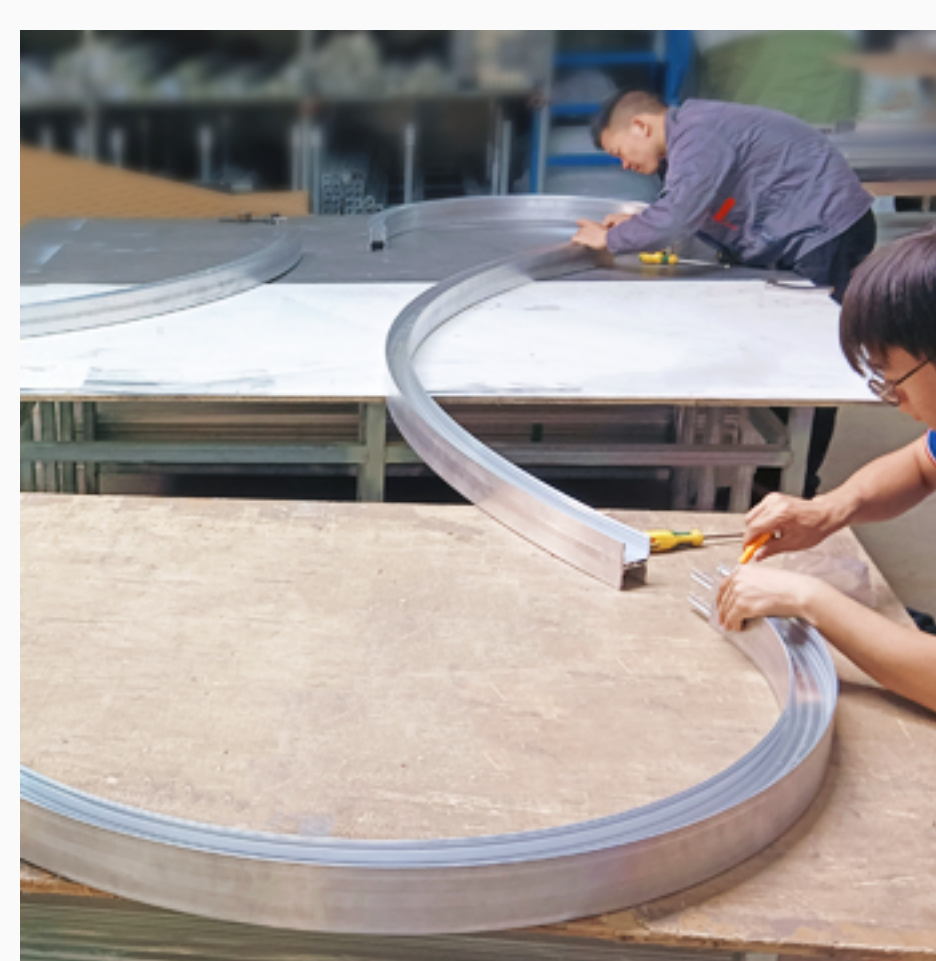

Our products undergo rigorous testing to meet global lighting standards, ensuring compliance with CE, RoHS, and EMC standards for international customers.

The after-sales department provides partners with continuous technical support.

### Big Projects & Small Installations

We are pleased to offer a comprehensive range of lighting solutions, from simple and small installations to large and complex projects.

### Customized

Offers custom tools and complementary accessories for unique products.

### Our Showroom

Our showroom has been meticulously designed with environmental simulations to visually present our comprehensive range of LED products.

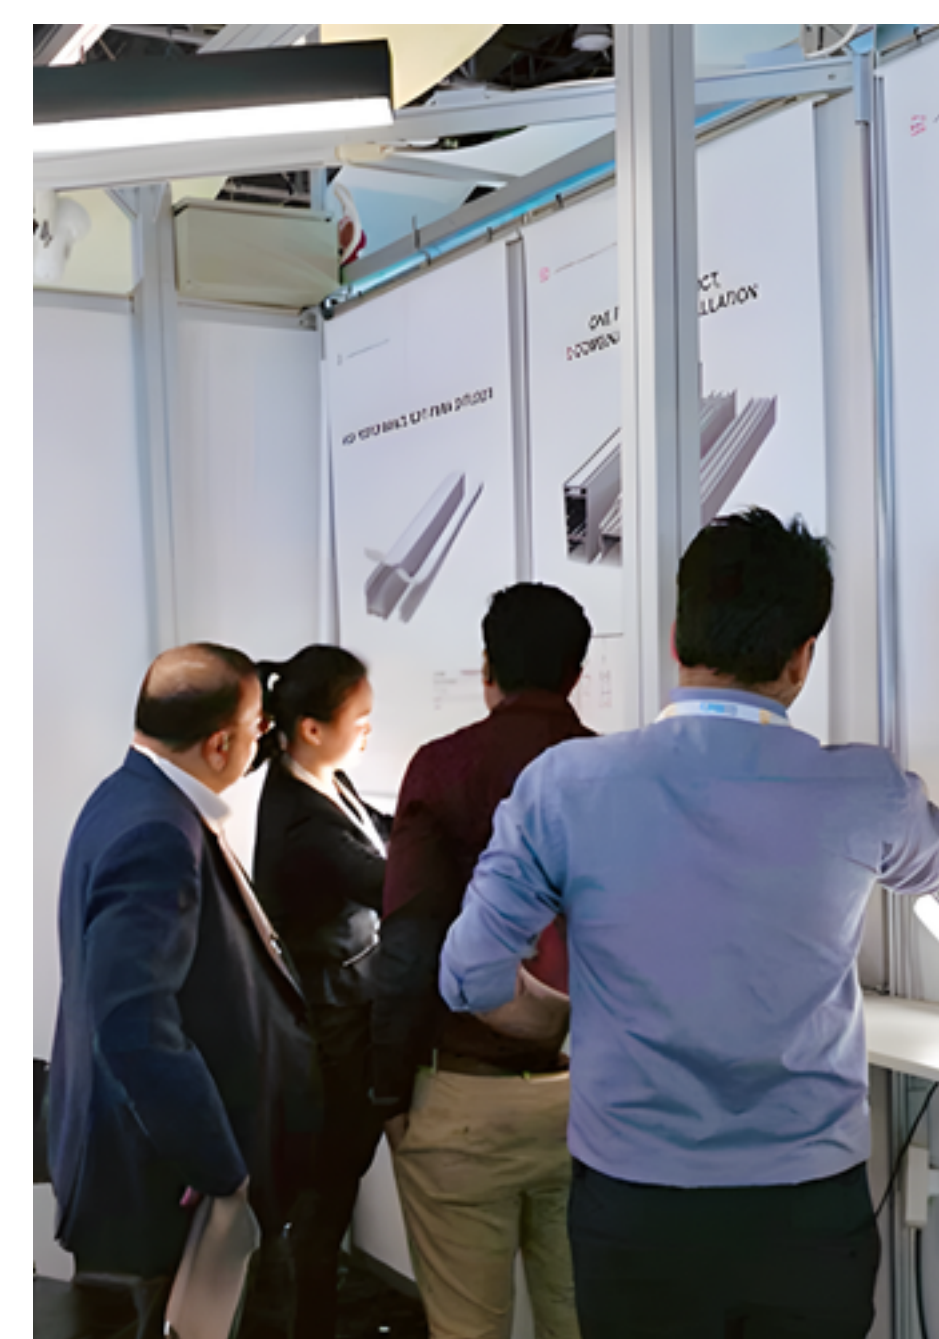

### Our Warehouse

All of our products are stored in our 1500m<sup>2</sup> warehouse in Shenzhen. Our warehouse is spacious and well-stocked, which eliminates any concern on the part of our customers regarding delivery times.

### Our Exhibitions

Annually, we will travel to various countries and locations to showcase our latest products.
