DESCRIPTION

KS28 is an independently controlled dual output SSR, which has two completely independent SCR output integrated in one standard panel mount package. It offers two DC input options 4~15VDC and 15~32VDC and two AC output voltage options 240VAC and 380VAC with three output current ratings 25A, 40A and 50A. The SSR provides photoelectric isolation between input and output with dielectric strength 4000V and has the built-in RC snubber circuit. KS28 can be used in the control of heating, lighting, etc.

FEATURES

- ◆ Independently controlled dual output SSR
- ◆ Photoelectric isolation
- ◆ Dielectric strength 4000V
- ◆ Built-in RC snubber circuit
- ◆ SCR output
- ◆ Panel mount

PRECAUTIONS

1. Make sure the wiring of input and output and the input polarity are correct so as to avoid any damage to the SSR.
2. The heat produced by the SSR during the working process must be dissipated via the metal base of the SSR. Please coat the SSR metal base with some thermal grease or a thermal pad, and then firmly press the SSR against the heatsink to ensure the full adherence.
3. The SSR requires proper heat sinking for heat dissipation in full load. When the ambient temperature is high, the load current must be derated. Please refer to the curve of Max. Load Current vs. Ambient Temperature for derating.
4. Please do not use the SSR exceeding the limitation which is specified on this datasheet.
