Origin

Changbai mountain, in the northeast of China, the most traditional and Daodi farm for ginseng since ancient time.

Storage

In clean, cool ,dry place; Keep away from strong, direct light.

Active Ingredients

The main bioactive compounds consist of ginsenosides, which are divided into three categories according to the chemical structures: panaxadiols, panaxatriol and oleanolic acids.

Advantages of Boherbs Ginseng

1. Unique geographical location: virgin forest environment, irrigation by Changbai mountain water. **100% natural and organic standards.**The quality is controlled from the source, the forest humus soil is planted, and the forest is artificially planted to grow naturally.

2. Freshly harvested and carefully selected: timely harvesting of ginseng is of great significance for improving the yield and quality of fresh ginseng and finished products. Try to do the processing while picking and avoid prolonged exposure to sunlight or rain, and avoid excessive accumulation, which may cause ginseng roots to run out of pulp, heat, and rot, and will affect the quality of finished products.

3. Natural sun-drying, no sulfur fumigation, no floating color with green health.

4. Selected full-year-old ginseng with large size: On the outside, it has deep skin texture and obvious spiral pattern; the ginseng is thick and slender; The ginseng shape is long and slender, the body does not branch; the pearl points can be clearly seen, and the quality is guaranteed.

5. Professional management and strict quality inspection and control.

Before mass production, we always provide pre-production samples. We always conduct a final inspection before shipment.

Applications

1) . Medical and health care industry, can be formulated as anti-aging, anti-fatigue and protect brain health food;

2) . Cosmetics industry, can be formulated as reduce wrinkles, activate skin cells, freckle and improve skin elasticity of cosmetics;
