Boherbs product advantages and features

1.Boherbs' wolfberry is originally produced in **Qinghai, China**.Snow water irrigation in Qilian Mountains.

The sugar content and medicinal properties of the Qinghai-Tibet Plateau under ultra-strong ultraviolet radiation are higher than those of ordinary goji berries. The organic material content is good, and the floating rate is lower.

2. Adopting advanced production and processing technology,locking the nutrition of the fresh fruit in the first time,The fruit with few seeds, thick flesh, uniform size, no broken fruit.**With"high nutrition" "Good color and good taste"**.

3. Excellent production management team and adopting **advanced laboratory testing equipment**. Boherbs wolfberry's sulfur dioxide detection content is below 10ppm.

Nutritions

- Contain 18 amino acids.
- Contain 21 trace minerals.
- Contain B-complex vitamins.
- Contain more protein than whole wheat.

Quality Control

1. Wolfberry Fruit are collected in summer and autumn when the fruits become orange-red.

2. Boherbs offers only cleanest and highest quality Organic Certified Goji Berries, which are tested and approved by third-party lab on pesticides residue, heavy metals and SO₂ by every lot.

3. Starting from September, fresh goji berries will be dedicately processed to dry in sun and remove from bad, small-sized fruits, imprurities and leaves by color-selector, only the best-color, fullest, large-sized berries are selected, preserving their remarkable nutrients.

Production Process

Functions

- Improves and regulates immune system.
- Anti-aging, keep young.
- Lowers blood lipids.
- Protects liver function, prevents fatty liver.
- Elevate level of testosterone.
- Improves white blood cell counts during chemotherapy.

Actions

- 1). Tonify the liver and kidney.
- 2). Replenish essence and blood.
- 3). Improve vision, tranquilize the mind.
- 4). Promote the production of fluid.

Applications

- Goji berries can be used as snacks or mixed with recipes or cooking.
- A good daily intake of Goji berries is 20-50 pieces.
- It is also used in cosmetic industry, drinks, tea ingredients.

Why are there white spots on the tip of wolfberry?

Because of the high sugar content of Qinghai wolfberry, the holes will be blocked by substances when the fruit is picked according to the best harvesting period, and it is difficult to see white spots on the stem of the dried fruit. White spots can be seen if picked too early
