春晖本草

2. **Strictly controlled processing** in a clean and complete factory. The berries are washed with water, hand-selected, cut, dried, and divided into different grades. Each piece of hawthorn slices guarantees the highest quality, fresh color, richest content, 100% pesticide-free. Meet the organic standards, the fruit slices are plump and natural in color.

3. **Natural sun drying**, uniform size and thickness, **no sulfur, no additives**, smelling fragrant and tasting sour and sweet.

4. **Excellent production management and inspection team.**

Before mass production of all products, we always provide pre-production samples. We always conduct a final inspection before shipment.

Benefits

1. Invigorate the stomach and promote digestion
2. Prevent and treat cardiovascular diseases and soften blood vessels
3. Lower blood pressure and lower cholesterol
4. Diuresis, sedation
5. Promoting blood circulation and removing stasis
6. To relieve asthma and phlegm, inhibit bacteria, and treat abdominal pain and diarrhea.
7. Anti-aging

Processing Methods and Functions

1. Raw Fructus Crataegi

Method: Remove impurities, fallen nucleus and carpodium of the drug.

Function: The raw drug can activate blood and resolve stasis.

2. Stir-frying Fructus Crataegi

Method: Put the cleansed drugs in a frying container, heat with medium fire and stir-fry them until the color of the drugs turns deeper.

Function: Frying can moderate the drug's sour taste and irritation to the stomach, which enhances the effect of promoting digestion and removing stagnation. Stir-fried drugs can be used for splenic asthenia, dyspeptic retention, poor appetite, low spirit and lack of strength.

3. Parching Fructus Crataegi

Method: Put the cleansed drugs in a frying container, heat with medium fire and stir-fry them until the drugs turn coke brown outside and coke yellow inside.

Function: This method can moderate the drug's sour taste and increase the bitterness, which makes it good at promoting digestion and arresting diarrhea. So parched drugs are often used to treat food stagnation, the spleen deficiency and diarrhea. For example, it can be used in Baohe Pills to treat food stagnation.

4. Carbonizing Fructus Crataegi

Method: Put the cleaned drugs in a frying container, heat with strong fire and stir-fry them until the drugs turn coke black outside and coke brown inside.

Function: Charred drug is astringent in taste and has the functions of stanching bleeding and arresting diarrhea.

Precaution

The drug should be used cautiously for cases with deficiency of spleen and stomach but without indigestion.

Advantage of company

Boherbs Co., Ltd. is a professional manufacturer and wholesaler of herbs and herbal powders (organic certification and conventional standards), plant extracts, food ingredients, spices and herbal teas.

Our company has a professional R&D and production team that can meet the diverse needs of customers.
