Why honeysuckle surface have fluff ?

Authentic honeysuckle buds are club-shaped, thick and thin below slightly curved, yellow white or green white surface, with dense short fluff.

Small fluff on honeysuckle flower is an important character to distinguish the true honeysuckle.

Main Benefits

- Prevent infections
- Improve digestion
- Treat cold and flu
- Boost immunity
- Regulate blood sugar levels
- Reduce inflammation

Advantage of boherbs honeysuckle.

1. Self-owned farm in **Shandong, daodi farm** for honeysuckle flower. A continental monsoon climate zone, has sufficient light and heat, and does not use pesticides, fertilizers and herbicides to grow high-quality honeysuckle.

Honeysuckle is **organic** certified by the international Certifying Body.

Manual weeding 7-9 times / year.

Water irrigation by pure mountain spring.

Skilled farmers pick and harvest in May and June every year.

2. **Fresh hand-picked, full-length strips, heavy fluff** : The best time for harvesting is early morning, when the buds are not fully open, with sufficient nutrients, strong odor and good color.

3. **Adopt advanced drying technology.** Without any added ingredients, which minimizes the loss of chlorogenic acid during the drying process of honeysuckle to the greatest extent, and preserves the medicinal ingredients of honeysuckle to the greatest extent.

4. Produce in strict accordance with **GMP standards and testing.**

Our own laboratory tests its moisture, microorganisms, etc.

Third-party lab test like SGS, EURO-FINS etc.

Applications

- Tea Ingredients
- Health food raw material
- Supplement raw material
- Cosmetic & personal care products raw material
- Medicine Raw material
