### **Usage and Dosage**

10-20g for decoction. The stewed sample is used for relieving diarrhea.

### **Advantages**

1. Adopt special planting method: Build herringbone frames. It is conducive to better growth and avoids being blown down by the wind.
2. Seasonal excavation: Every winter (December-February) is the best season for harvesting. Pueraria lobata roots have stopped growing and enter the dormant period. At this time, the accumulated active ingredients are the most and the quality is the best.
3. No sulphur, no additives, quality guaranteed.
4. Select by hand, small cube cutting, uniform particles and less impurities.
5. Excellent production management team and adopting advanced laboratory testing equipment. The quality can be guaranteed.

### **Quality control**

Before mass production, we always provide pre-production samples. We always conduct a final inspection before shipment.

Boherbs only provides the cleanest and highest quality certified organic Pueraria lobata root, and each batch is tested and approved by a third-party laboratory for pesticide residues, heavy metals and sulfur dioxide.

### **Main value**

1. Nourish the body and relieve physical weakness
2. Prevent high blood sugar: Wild Pueraria lobata root contains a lot of puerarin and flavonoids can remove cholesterol and fat in human blood, also promote insulin secretion and prevent blood sugar from rising.
3. Anti-alcohol and detoxification: Wild Pueraria lobata can inhibit the activity of alcohol in the human body, and reduce its damage to human tissue cells.
4. Prevent of fatty liver
5. Lowers blood pressure
6. Anti-cancer: Pueraria flavonoids have anti-cancer effects.
