

## Magnolia officinalis Bark

Common Name:	Magnolia officinalis Bark
Botanical Name:	Magnolia officinalis Rehd.et Wils.
Latin Name:	Magnoliae Officinalis Cortex
Pinyin Name:	Hou Pu
Plant Part Used:	Bark
Quality Standard:	European Pharmacopoeia Standard
Specification:	Cut/Powder

### Characteristic

It has aroma, spicy and slightly bitter taste.

Dry bark is in roll shape or double roll shape

The root bark is in a single tube shape or irregular pieces, hard in quality, easy to break, and fibrous in cross section.

The branch bark is single-tube, brittle, easy to break, and fibrous in section.

### Attribution in TCM

Bitter, pungent, and warm.

The spleen, stomach, lung, and large intestine meridians in attribution.

### Active ingredients

Contains volatile oil, magnolol, alkaloids, saponins, tannins and trace niacin.

### Harvesting and processing

Harvest from April to June, and dry root bark and branch bark directly in the shade;

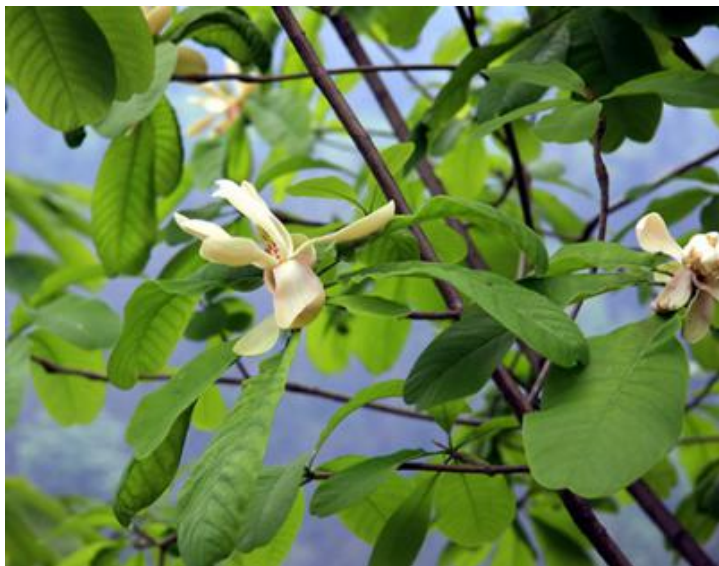

After the dry skin is boiled in boiling water, stack it in a damp place until the inner surface turns purple-brown or brown, steam it out, roll it into a tube, and dry it.

Due to excessive debarking and deforestation, the resources of this species have been drastically reduced, and the distribution area is getting smaller and smaller, causing the wild magnolia to be devastated and facing the endangered situation. Wild plants are extremely rare.

### Functions
