

Poria Cocos Certified Organic

Common Name:	Poria Cocos Certified Organic
Botanical Name:	Poria cocos(Schw.) Wolf
Pinyin Name:	Fu Ling
Plant Part Used:	Sclerotium
Quality Standard:	Organic Certified
Specification:	Cut, Powder, or OEM
Harvesting and Collection:	Collect from July to September

Specification

Poria cocos cut, block fresh poria cocos peel by cutting system, dried in the sun.

Processing

Poria cocos (Schw.) Wolf harvest from July to September, after dug up to remove sediment, dry in the sun, repeatedly to skin wrinkles, after most of the internal moisture loss, air-dried to Poria cocos whole.

Effective Ingredients Of Poria Cocos

Polysaccharides: pachy-man, Pachymaran, ergo-sterol, caprylic acid, undecanoic acid and lauric acid.

Triterpenes: pachymic acid, tumulosic acid, 3 -hydroxy-7.9, 24-tcmlibien-21-oic acid, pachymic acid methyl ester, etc.

Advantage

1. Keep far away from fertilizers and pesticides, fresh and direct supply from the place of production. Source control. Boherbs' Poria are produced in Dabie Mountain, Anhui. The suitable climate, high altitude, and the red soil with high water content provide a good environment for the growth of Poria. Intensive cultivation of traditional agronomy, organic base cultivation.

2. Natural raw materials, no additives, no sulfur.

The color is natural, the cut is even, the whole is not broken, the powder is full, and there is no impurities.

After soaking in water, the color is clear and translucent, and it remains intact after long-term soaking.

3. Strictly inspection program, inspection of raw materials before entering the factory, and inspection of finished products. The quality can be guaranteed.

Efficacy

The main component of poria cocos is poria cocos glycan with high content.

- * It can inhibit a variety of bacteria.
- * It can reduce gastric acid, has the prevention effect to the alimentary canal ulcer.
- * It has obvious protective effect on liver injury.
- * It has anti-tumor effect.
- * It can regulate immune function in many ways.
- * It can accelerate the recovery of leukopenia caused by chemotherapy.
- * It has a calming effect.

Applications Of Poria Cocos In Cosmetics

Poria cocos extract can promote the proliferation of integrin, which can reflect the proliferation of fiber bud cells and the adhesion between cells and fibrin. The proliferation of integrin can reduce the diameter and volume of collagen wrapped in fiber bud cells, so as to have the effect of contraction.

Therefore, poria cocos extract can be used to tighten skin and fine lines cosmetics; Poria cocos extract can also be used as a moisturizing agent, antibacterial agent and skin conditioner.

Identification

1. The real Poria is insoluble in water, so it stays intact after soaking in water
But fake Poria cocos are soaked and turned into granules or powder to dissolve in water
2. Poria cocos are covered with a layer of brown Poria cocos skin. The light red loose layer on the outside is called Chi Poria, and the white dense part inside is called Bai Poria.
3. The colors of Poria are white and dark, not all of them are white, if they are all white, they may be smoked by sulfur.

Advantages of the company

1. Boherbs Co., Ltd, is a professional manufacturer, supplier and wholesaler for certified organic and premium quality herbs, plant extracts and natural ingredients in the pharmaceutical, nutraceutical food and natural cosmetic industries.
2. Organic farm: select high-quality seedlings to ensure quality from the source.
