Botanical Name:	Rosa Rugosa Thumb.
Latin Name:	Rosae Rugosae Flos
Pinyin Name:	Mei Gui Hua
Plant Part Used:	Flower
Quality Standard:	European Pharmacopoeia Standard
Specification:	Whole Flower/Powder
Harvesting and Collection:	Late spring or early summer flowers will open when the batch picking, dry at low temperature in a timely manner.

Active Ingredients

Roses contain volatile oils, mainly phenylethanol, citronellol, geraniol, nerol, and eugenol.

Benefits of Rose Tea

1. Alleviate some of the symptoms of menstruation, in particular to ease painful cramping.
2. Help stave off the signs of aging like wrinkles and sagging
3. Ease the soreness in your throat
4. Boost your immune system
5. Improve digestion
6. Help to unwind, ease your mind and even help you to get a good night's sleep
7. Promotes both the quantity and frequency of urination
8. Weight loss
9. Treat constipation

Advantage

1. The rose comes from a traceable plantation with a good growing environment and large temperature difference between day and night. The groundwater is rich in a variety of minerals, richer in nutrients, and its polyphenol content and selenium content far exceed those of conventional roses, reaching EU standards.
2. Carefully cultivate, adhere to the use of organic standards to grow roses, and do not use pesticides, herbicides, growth regulators, etc.
Combination of manual weeding, automatic dropper and sprinkler irrigation.

3. Picking by hands

Rose picking starts at 3 in the morning, and only 1/3-1/2 of the newly opened buds are picked. This flower has the highest content of active ingredients.

Testing: We are responsible for the quality of each batch of products. Our own laboratory tests its moisture, microorganisms, etc. Third-party laboratories detect pesticide residues and heavy metals.

Rose Plantation according to Organic rules, bio fram in Pinyin, Shandong.

1. Blooming in late Spring and early Summer, Rose flowers grown in Kushui Town in Gansu, No.1 town of Rose, flourish well with abundant juices and strong pure fragrance. In Boherbs' local farm, Rose flowers are dedicately harvested and processed.
2. Fresh flower buds are picked only in the morning after the dew evaporated until 10:00am → Select out bad-colored ones, leaves and impurities → Dry in low temperature immediately within 2 hours after harvesting to keep the fragrance & prevent the buds from blooming → Make grading & specifying.

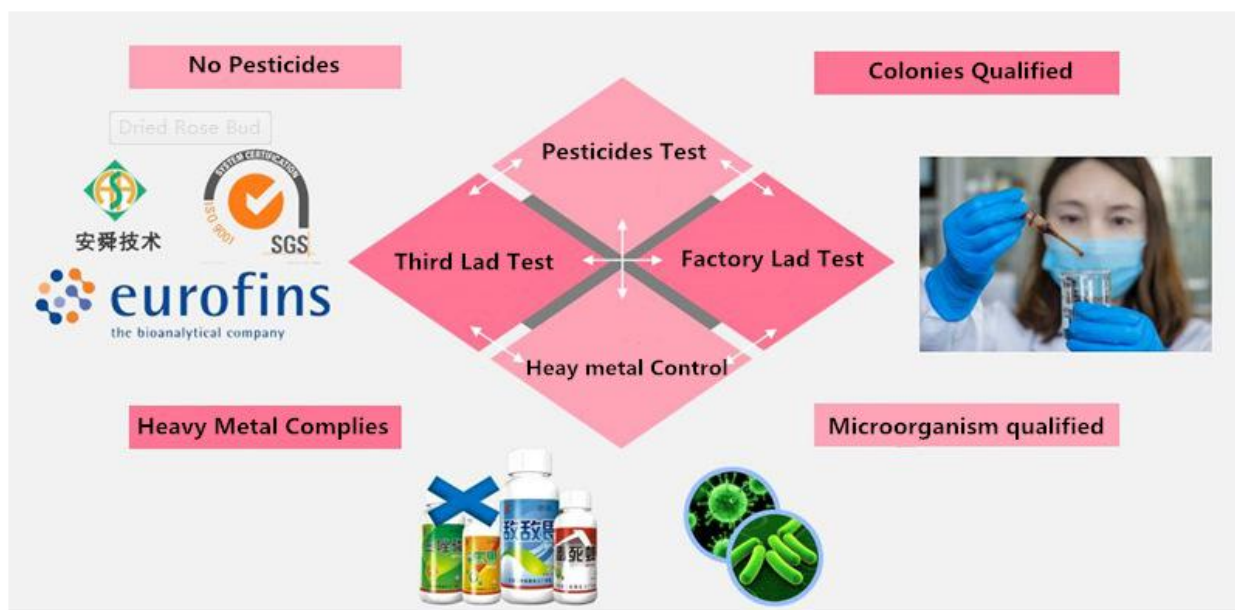

How do we guarantee the quality of roses?

Pesticide testing in our own laboratory.

There is also a third-party laboratory test, the quality is guaranteed

Before mass production, we always provide pre-production samples. We always conduct a final inspection before shipment.

Rose Usage Suggestions

Dried rose could be used as tea, for beauty products like facial mask, facial cleaner, perfume etc.
